#### **PREFACE**

This report was prepared by the Geological Survey in cooperation with the States of Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and Wisconsin, and other agencies, by personnel of the Water Resources Division under the direction of:

C. G. Paulsen-----	Chief Hydraulic Engineer
A. N. Sayre-----	Chief, Ground Water Branch
P. E. Dennis-----	District Geologist (Ground Water), Grand Forks, N. Dak.
V. C. Fishel-----	District Engineer (Ground Water), Lawrence, Kans.
F. C. Foley-----	District Geologist (Ground Water), Madison, Wis.
H. G. Hershey-----	District Geologist (Ground Water), Iowa City, Iowa
H. A. Waite-----	District Geologist (Ground Water), Lincoln, Nebr.

# WATER LEVELS AND ARTESIAN PRESSURE IN OBSERVATION WELLS IN THE UNITED STATES IN 1947

---

## Part 3. NORTH-CENTRAL STATES

---

### INTRODUCTION

By A. N. Sayre and others

#### Significance of records of water level and artesian pressure

The rock formations of the earth are great natural reservoirs in which a part of the water derived from rain and snow is stored to supply wells and springs and to maintain the flow of streams during periods of fair weather. Water levels in wells register the stages of these natural reservoirs; they show the extent to which water supplies are depleted by drought or by heavy pumping, whether for public waterworks, irrigation, or industrial uses, and the extent to which they are replenished in seasons of abundant rainfall or melting snow. The changes in pressure recorded on flowing wells indicate depletion or replenishment of the artesian reservoirs.

#### Annual publication of records by Geological Survey

The regular publication of records of water level and artesian pressure in the United States was begun by the Geological Survey in 1935 and has continued yearly since. The records for the entire country were published in a single volume each year through 1939. Beginning with 1940 the records have been published in six volumes, covering the northeastern, southeastern, north-central, south-central, northwestern, and southwestern sections of the country. Hawaii is included in the southwestern section. (See fig. 1.) The following table gives the numbers of these reports. This series of water-supply papers is in a sense an inventory, year by year, of the ground-water supplies in such parts of the country as have been covered.

Water-supply papers on water levels and artesian pressure in observation wells in the United States

Scope of present volume

The present volume covers the north-central States and gives records of water level and artesian pressure in about 1,766 observation wells of the Geological Survey and cooperating agencies in Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, and Wisconsin. Of these wells, 71 are equipped with automatic water-stage recorders. For some wells not previously reported complete records of water level are given. For wells whose previous records have been published this volume gives only the current records. If a complete description of a well has been published in a previous report, only the well number or the well number and a brief identifying description are given in this report. The numbers in parentheses immediately following a well number are those of the water-supply papers in which earlier records of that well are given and the pages on which they appear. An asterisk indicates that a description of the well is given in the paper whose number is so marked. This report includes about 13,516 individual determinations of water level and artesian pressure.

Land-surface datum

Before 1943, in Geological Survey reports, the water levels and artesian pressures for some wells were given in feet above or below the measuring points and for other wells in feet above or below sea level or above or below various assumed datum planes. It had been considered inadvisable to adopt a standard procedure in expressing water levels and artesian heads until after a period of trial with datum planes of different kinds. In

1943, however, it was decided that uniform practice should be adopted. Accordingly, precise datum planes were established approximating the land surface at each well. The water levels and artesian heads for all wells listed in this report are given in reference to land-surface datum planes.

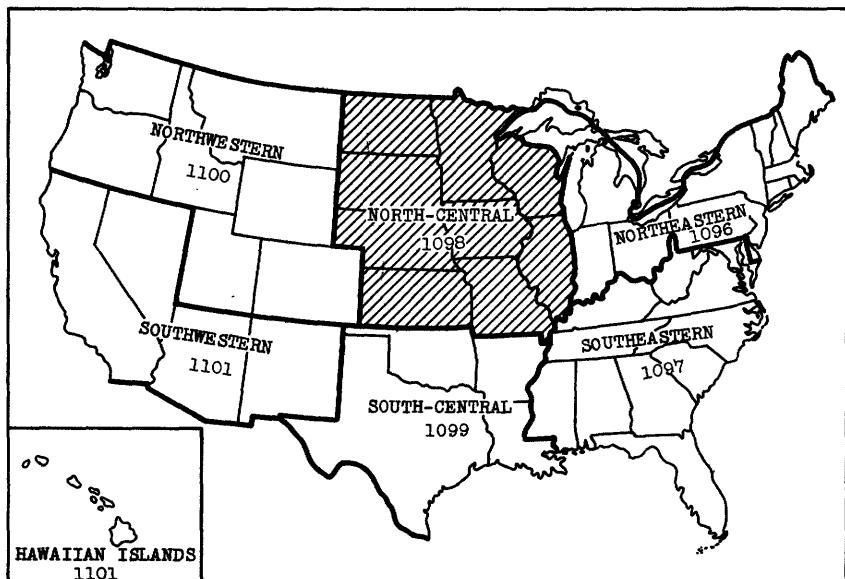

Figure 1.--Outline map of the United States showing sections of the country covered by the six water-supply papers on water levels and artesian pressure in observation wells in 1947. The shaded section represents the part of the country covered by this volume.

If the water levels or artesian heads are referred to land-surface datum for the first time, a conversion factor is given in the descriptive matter preceding them in order to facilitate comparison of the older and newer records. Wherever the conversion factor is given in earlier reports it is not repeated in this report. New data as to the positions of the measuring point and of the bench marks, in feet above or below land-surface datum planes, will be published in succeeding annual reports.

#### Network of key observation wells

During 1942 the Geological Survey established a network of key observation wells in order to make available current information on general ground-water conditions over the country. These wells were selected because

the fluctuations of water level in them are believed to be typical and they represent the general fluctuations that occur in the parts of the country in which the wells are situated. At the end of 1947 the network included about 160 wells in 45 States. About 40 of the wells were established expressly for the network in 1942 and about 20 were established in 1943; the other 100 were selected from wells measured regularly in connection with cooperative ground-water investigations. The coverage of the country is still far from adequate, and it is expected that some wells not now included will be added to the network from time to time.

Changes in ground-water level in 1947 in the north-central part of the United States

The average precipitation in three of the States in the north-central part of the country--Iowa, Kansas, and Nebraska--was above normal in 1947. It was also above normal in northern North Dakota, but in southern North Dakota and in the other four States in this section precipitation was below normal. The fluctuations of both water level and artesian pressure in wells depend, however, on many factors besides the amount of precipitation. In certain of the observation wells there are fluctuations caused by differences in the rate of pumping or artesian flow from other wells in the area, but most of the observation wells are not noticeably affected by pumping or artesian flow. A summary of the changes in ground-water level is given in the chapter for each State.

Acknowledgments

Acknowledgments for effective services in the preparation of this water-supply paper are due Mrs. Nauvoo Ragland, Mrs. Frances Dowell, and Misses Dorothy M. Ireland and Beulah B. Brunson, and Rodney Hart. Miss Ireland had general charge of the assembling of the several reports and did the editing; Mr. Hart prepared the illustrations; and Mrs. Ragland, Mrs. Dowell, and Miss Brunson did the offset typing.

## ILLINOIS

By W. E. Hale and J. B. Cooper

### PROGRAM OF WORK

Measurements of water level were continued during 1947 in the well at Princeton, Bureau County, the only well in Illinois in the Nation-wide network of observation wells. It is equipped with a float-tape gage and was first observed in 1942. Since then measurements have been made approximately once a week.

### FLUCTUATIONS OF WATER LEVEL

The fluctuations of the water level in the well at Princeton during 1947 varied from a low of 19.40 feet below land-surface datum, on November 15, to the high for the year of 2.85 feet below land-surface datum on April 5. The year closed on December 27 with the water level at 17.09 feet below land-surface datum, or 0.90 foot lower than the water level at the start of the year. The average water level for the last 3 months of the year was 18.37 feet below land-surface datum compared with the average water level of 15.25 feet below land-surface datum for the first 3 months, a difference of 3.12 feet.

## IOWA

By J. B. Cooper, W. E. Hale, and C. W. Lane

### PROGRAM OF WORK

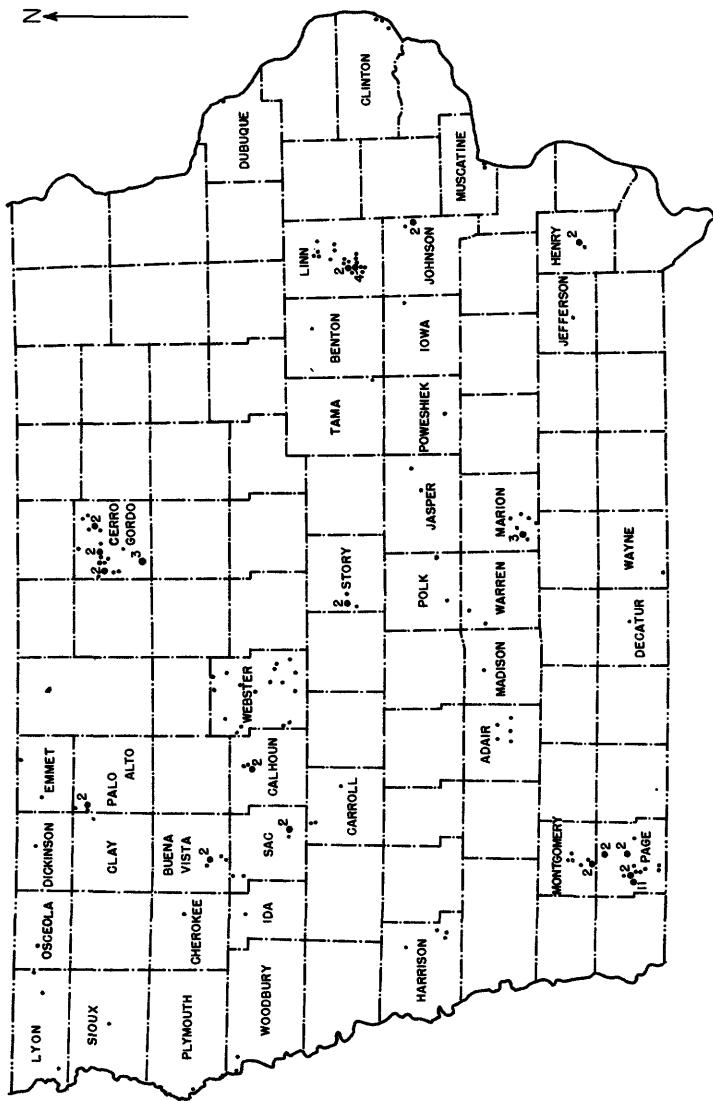

The State-wide program of investigation of ground-water resources and inventory of ground-water levels in observation wells in Iowa was continued in 1947 in cooperation with the Iowa Geological Survey.

The majority of the observation wells were established in 1938, but additions have been made since that time. The observation wells in the Tarkio Creek Valley area of southwestern Iowa were established in 1934 through a program organized by the U. S. Geological Survey in which the Soil Conservation Service of the United States Department of Agriculture participated for several years. All of these wells are now included in one program for the State.

Past records of the water-level measurements in the wells in the Tarkio Creek area are published in Water-Supply Papers 777, 817, 840, 845, 886, 908, 936, 988, 1018, 1025, and 1073, and those for the wells established in 1938 are given first in Water-Supply Paper 886.

At the beginning of 1947 measurements were being made on 172 wells in 39 counties throughout the State. During the year 14 wells were dropped from the program, and 6 wells were added, making a total of 164 wells in the observation-well program at the end of the year. (Fig. 2.) Automatic water-stage recorders were being maintained on 11 wells at the close of the year.

Water-level measurements were being made weekly on 6 wells, monthly on 47 wells, and quarterly on most of the remaining wells. During the year about 990 wetted-tape water-level measurements were made in the State and are included in this report. In addition, many water-level measurements were made in connection with pumping and production tests and in gathering data on new wells throughout the State. These additional measurements and descriptions of wells are not included in this report.<sup>7</sup>

## FLUCTUATIONS OF WATER LEVEL

The average precipitation over the State in 1947 was 35.23 inches which was slightly more than the amount for 1946. The 1947 average was 3.72 inches above normal and 0.08 inch above that of the previous year.

The rainfall in 1947 was very erratic in distribution. For many sections of the State, precipitation in June exceeded that for all previous records for this month. The State average in June was 10.29 inches which exceeded the previous high average by more than 2 inches. The month of August, however, was the second driest August of record. Above-normal precipitation occurred over most of the State during the months of January, April, May, June, October, November, and December. Precipitation was below normal during the other months.

The following table lists the average net change in the water level between December 1946 and December 1947 in groups of shallow wells by counties throughout the State.

Average net change in water levels, in feet, in shallow wells in Iowa and annual precipitation and departure from normal, in inches, at the nearest U. S. Weather Bureau station, 1947

County	No. of wells	Average net change	Precipitation	Departure from normal
Adair	4	-1.67	38.94	+7.45

Webster	7	+.51	33.13	+2.00

a These wells, one in each county, are in the vicinity of Lost Island Lake.

b These wells are in the Tarkio Creek Valley which occupies parts of both counties.

As indicated, the majority of the wells are at a lower stage by the end of 1947 than at the end of the previous year even though the precipitation was, in most cases, above normal for the year. This condition can be attributed to the heavy rains and subsequent record or near-record floods during June. This short wet period was followed by hot and dry weather that persisted from mid-July until the first weeks of September.

The water table declined rapidly during this interval and remained at a low stage during the remainder of the year. This combination of heat and drought appreciably affected yields of corn and soybeans over the State. Throughout the farming area the yield of domestic and stock wells, which depended upon shallow aquifers for water, was reduced importantly. Locally the water table rose somewhat during the last quarter of the year because precipitation was slightly above normal during that period.

In most areas, however, freezing temperatures began during the first week in November and continued with few interruptions throughout the remainder of the year. Accordingly, little ground-water recharge resulted from precipitation which fell during that period. In general, the water table remained essentially static or was slightly higher than the low stage of the summer.

The Tarkio Creek Valley area, in parts of Montgomery and Page Counties, Iowa, and Atchison County, Missouri, contains a number of shallow observation wells established in 1934. Water-level measurements have been made on this group of wells at least once a month for almost the entire period of record. In 1947, these measurements were made by Dean W. Knox, local observer. Records of the water levels in the Atchison County area, Missouri, are given in the section of this report that relates to observation wells in that State.

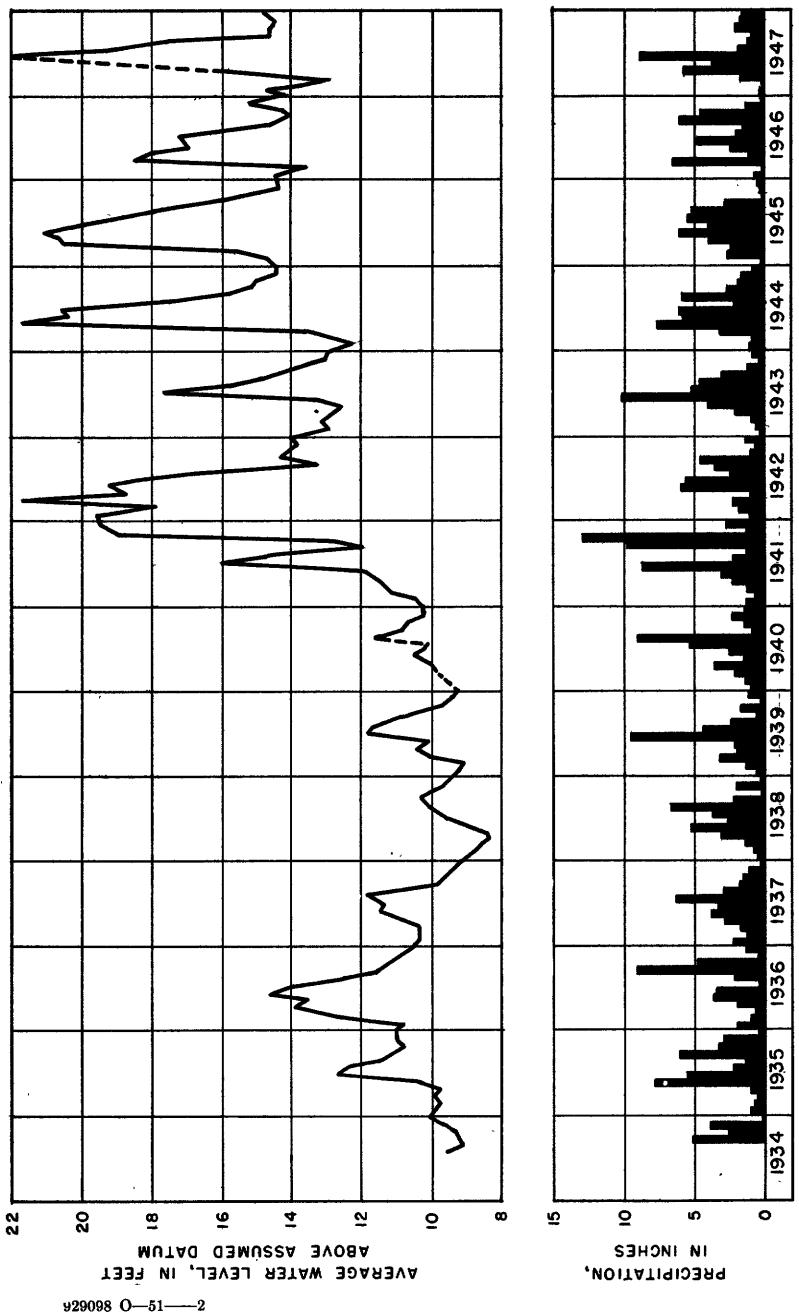

Measurements in 8 wells (Nos. 1, 5, 6, 7, 10, 12, 15, and 17) were used in computing the average water level for each month in 1947. These averages are given in the following table.

Average water levels, in feet above assumed datum planes, in 8 observation wells in the Tarkio Creek area, Iowa-Mo., 1947

Date	Water level	Date	Water level	Date	Water level	Date	Water level
Jan.	14.64	Apr.	16.40	July	19.38	Oct.	14.59
Feb.	13.38	May	.....	Aug.	17.51	Nov.	14.47
Mar.	12.70	June	22.05	Sept.	14.58	Dec.	14.53

Figure 3 shows the fluctuation of the average water level in this area during the period of record as indicated by the 8 wells listed above and the precipitation at Shenandoah, the nearest U. S. Weather Bureau station.

The fluctuation of the water level during 1947 in a shallow unused well (87-28-29NL) in the southern part of Webster County, near Harcourt, is shown in figure 4. The well is 41.8 feet deep, taps water in the

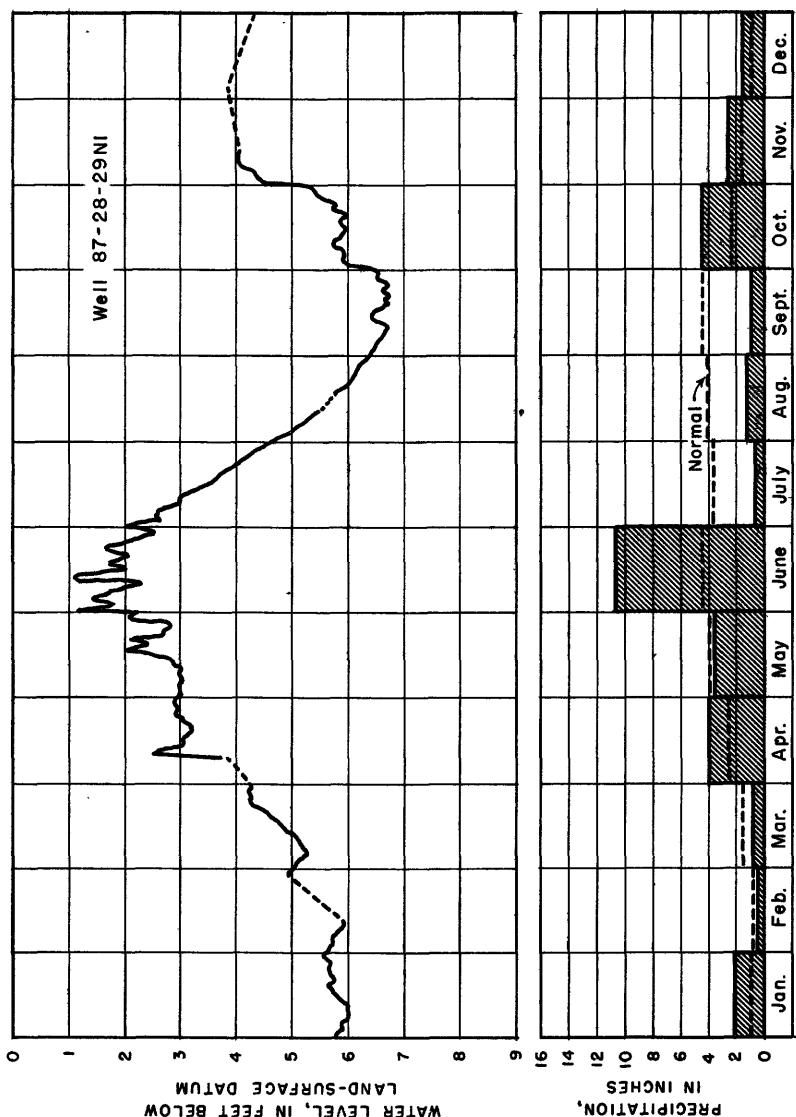

Figure 4.—Hydrograph of well 87-28-29Nl, near Harcourt, and monthly precipitation at Fort Dodge, Webster County, Iowa, for 1947.

glacial drift, and is representative of shallow wells in the county which tap the same water-bearing bed. The monthly precipitation at Fort Dodge, shown also on the graph, correlates closely with fluctuations of water level.

Figure 5 shows water-level measurements at the end of the month in well 84-6-20N1 which is an observation well 11.7 feet deep tapping water in the glacial drift. The well is in central Linn County about 5 miles northeast of Cedar Rapids. Close correlation between precipitation as recorded at the U. S. Weather Bureau station at Cedar Rapids and the water-level fluctuation in this well is evident. This well is representative of several shallow observation wells in the county and of many domestic farm wells which tap the same water-bearing bed.

Well 83-7-21K1, figure 6, at Cedar Rapids, Linn County, is illustrative of artesian rock wells affected by industrial and seasonal withdrawals for normal industrial use and air-conditioning purposes. This is an unused well completed at a depth of 156 feet in the upper part of Silurian dolomite which is locally about 400 feet thick. Most wells in Cedar Rapids develop water supplies for air-conditioning and industrial use from these strata. The observation well is about half a mile from the heavily pumped areas of downtown Cedar Rapids. The well was first measured in August 1943. On December 31, 1947, the water level was 59.87 feet below land-surface datum, which is 2.65 feet below its stage of December 31, 1943.

Well 83-7-11E1, at Cedar Rapids, has been used in previous reports to illustrate the effects of seasonal pumping in the Cedar Rapids area, but well 83-7-21K1, because of its closer proximity to the area of heavy pumpage, seems to illustrate better the stage of the artesian water levels in this widely used aquifer.

#### WELL-NUMBERING SYSTEM

The numbers assigned by the Federal Geological Survey to its observation wells in Iowa, other than those in the Tarkio Creek area, show the location of the wells according to the rectangular system for subdivision of public land. Each well number is made up of three segments, separated by hyphens. The first and second segments indicate the township and range.

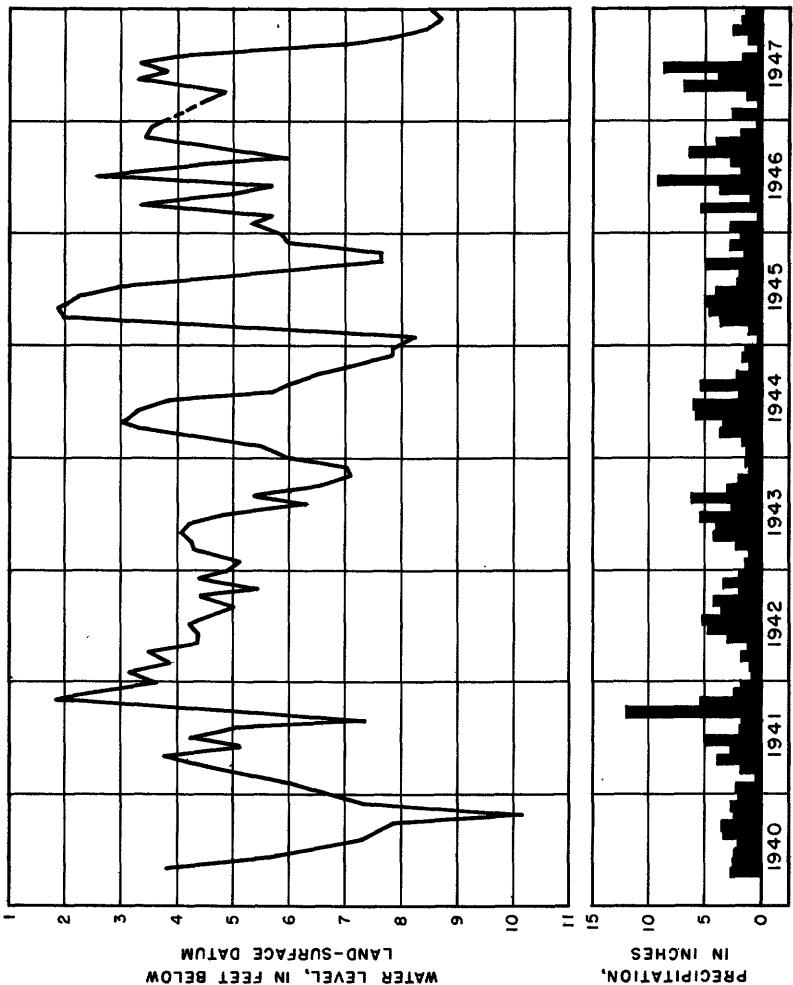

Figure 5.--Hydrograph of well 84-6-SONL, near Marion, and monthly precipitation at Cedar Rapids, Linn County, Iowa, from April 1940 to December 1947.

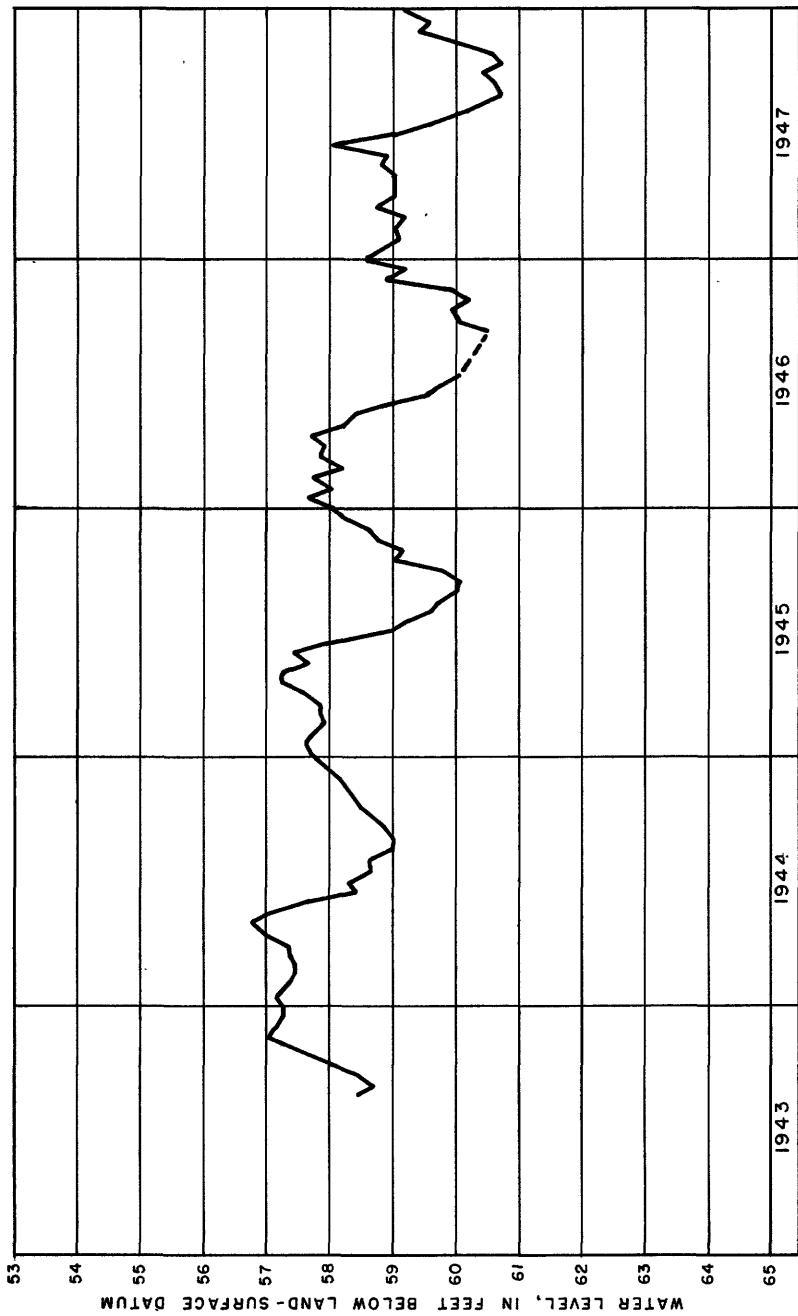

Figure 6.--Hydrograph of well 83-7-21KL at Cedar Rapids, Linn County, Iowa, showing fluctuations of water level from August 1943 to December 1947 caused by pumping in vicinity.

The third segment includes the section, followed by a letter representing the 40-acre subdivision of the section, as shown by the diagram, and the serial number of the particular well.

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

The letter E is added to the second segment representing the range when a well is east of the fifth principal meridian. In the number of the other wells, it is understood that the range indicated is west of the meridian.

For example, the number 76-31-25P1 indicates a well is in T. 76 N., R. 31 W., in the  $SE_1^4 SW_4^1$  sec. 25, whose serial number is 1.

SE $\frac{1}{4}$ NE $\frac{1}{4}$  sec. 22, T. 81 N., R. 6 E. This well is in a well field which contains 5 wells, 4 of which produce from the same aquifer, and 1 of which produces from a higher interconnected aquifer. Each of these wells is pumped at rates up to 2,300 gallons a minute. Interference occurs among the wells. The following water levels of well 2 in this field lists also the number of nearby wells which were pumping at time of measurement. Measurements made with air gage.

Dubuque County

89-3E-7Q1. City of Dubuque well 2. NE $\frac{1}{4}$ SW $\frac{1}{4}$ SE $\frac{1}{4}$  sec. 7, T. 89 N., R. 3 E. Drilled well, completed in 1899 at a depth of 1,306 feet. Diameter 12 inches from 0 to 900 feet; diameter 8 inches from 900 to 1,306 feet, total depth; 8-inch casing from 5 feet below land surface to 1,000 feet below land surface. Original artesian head was approximately 24 feet above land surface; 1905 artesian flow was approximately 265 gallons a minute with the head approximately 20 feet above land surface; 1908 artesian flow was approximately 120 gallons a minute. This well formerly pumped with air compressor and has not been used for several years. Principal aquifer is Dresbach sandstone of Cambrian age. Land-surface elevation is 611 feet above sea-level datum. Continuous water-stage recorder placed on well Feb. 28, 1947. Measuring point, top of wooden recorder platform over 8-inch casing, 5.00 feet below land-surface datum. Water levels affected by pumping of nearby wells. Highest observed water level, from recorder charts, 17.17 feet below land-surface datum on Apr. 21; lowest, 85.30 feet below land-surface datum on Aug. 23.

#### Iowa County

80-9-3L1 (\*946, p. 31; 988, p. 28; 1018, p. 23; 1025, p. 22; 1073, p. 18). NW $\frac{1}{4}$ SE $\frac{1}{4}$  sec. 3, T. 80 N., R. 9 W. No measurements made in 1947.

#### Jasper County

80-18-31C1 (\*908, p. 16; 938, p. 23; 946, p. 32; 988, p. 28; 1018, p. 23; 1025, p. 22; 1073, p. 18). P. W. Beukema. Formerly owned by Maynard Lust. NE $\frac{1}{4}$ NW $\frac{1}{4}$  sec. 31, T. 80 N., R. 18 W. Water levels, in feet below land-surface datum, 1947: Apr. 8, 12.36; June 10, 2.67.

80-17-17K1. Iowa State Conservation Commission core hole 8. NW $\frac{1}{4}$ SE $\frac{1}{4}$  sec. 17, T. 80 N., R. 17 W. Test hole drilled in March 1947 to depth of 151 feet below land surface. Converted into observation well by installing 2 $\frac{1}{2}$  feet of 1 $\frac{1}{2}$ -inch drive point well screen at bottom of 126 feet of 2-inch iron pipe. Packer placed near 44 feet to seal out water from overlying Pleistocene formations. Taps water in Red Rock sandstone of Pennsylvanian age which occurs in hole from 44 feet to 137.6 feet below surface. Land-surface elevation at well is 915 feet above sea level. Measuring point, top of 2-inch pipe, 0.8 foot below land-surface datum.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Mar. 7	70.10	May 6	69.30	Aug. 18	68.66
Apr. 19	69.55	July 7	68.65	23	68.85

#### Jefferson County

72-10-26A1 (\*946, p. 32; 988, p. 28; 1018, p. 23; 1025, p. 22; 1073, p. 18). Dr. Charles Carter. NE $\frac{1}{4}$ NE $\frac{1}{4}$  sec. 26, T. 72 N., R. 10 W.

Sioux County

95-45-5A1 (\*866, p. 119; 908, p. 26; 938, p. 35; 946, p. 46; 988, p. 50; 1018, p. 42; 1025, p. 43; 1073, p. 37). City of Sioux Center. In Sioux Center, in NE $\frac{1}{4}$ NE $\frac{1}{4}$  sec. 5, T. 95 N., R. 45 W. No measurements made in 1947.

Story County

83-24-2Q1. City of Ames well 2. SW $\frac{1}{4}$ SE $\frac{1}{4}$  sec. 2, T. 83 N., R. 24 W. Drilled well, completed in 1929 at an approximate depth of 110 feet. Abandoned as a producing well for public supply in 1935. City wells 1, 3, and 4 are in the same area and produce from the same aquifer as that tapped by well 2. The aquifer is sand and gravel of Pleistocene age. Continuous water-stage recorder installed on well on Nov. 18, 1947. Measuring point, top of wooden recorder platform over well, 4.1 feet above land-surface datum.

83-24-2Q1--Continued.

## KANSAS

### PROGRAM OF WORK

By Wilma P. Howard

The observation-well program in Kansas was continued in 1947 in cooperation with the State Geological Survey of Kansas, the Division of Water Resources of the Kansas State Board of Agriculture, and the Division of Sanitation of the Kansas State Board of Health. In addition to the State agencies names, the city of Wichita cooperated in Harvey, McPherson, and Sedgwick Counties. Also, an observation-well program was carried on in the Missouri Basin in cooperation with the Bureau of Reclamation. Three counties not heretofore included, Lincoln, Mitchell, and Norton, were added to the program in 1947 and 1 county, Dickinson, was dropped, making 49 counties in which wells were observed at the end of the year.

Results of cooperative ground-water investigations in Scott County<sup>1/</sup> and in Kiowa County<sup>2/</sup> were published in 1947.

At the beginning of 1947, periodic water-level measurements were being made in 480 observation wells in the State. During the year measurements were discontinued in 20 wells and begun or resumed in 69 wells. At the end of the year 529 wells were under observation. Of the wells measured in 1947, 9 were measured semiannually, 112 were measured quarterly, 372 monthly, 4 semimonthly, 21 weekly, and water-stage recorders were maintained on 12. The recorders on four of these wells--one in Finney County, one in Grant County, and two in Scott County--are maintained by the Division of Water Resources of the Kansas State Board of Agriculture. During the year 5,309 wetted-tape measurements were made in the State. For convenience, the data given in this paragraph have been arranged in tabular form, by counties, as follows:

<sup>1/</sup> Waite, H. A., Geology and ground-water resources of Scott County, Kansas: Kansas Geol. Survey Bull. 66, 216 pp., 16 pls., 16 figs.

<sup>2/</sup> Latta, B. F., Geology and ground-water resources of Kiowa County, Kansas: Kansas Geol. Survey Bull. 65, 151 pp., 11 pls., 10 figs.

Smoky Hill Valley

By D. W. Berry

As part of the Cedar Bluff Reservoir Project, the Federal Geological  
Survey, in cooperation with the Bureau of Reclamation, organized, in May  
1942, an observation well program consisting of 14 wells in the valleys

and adjacent uplands of the Big Creek and Smoky Hill River. These wells tap either the Niobrara formation of the uplands or the alluvium of the valley.

Periodic measurements of the water levels in the 14 wells by the wetted-tape method were started in May 1947, and 81 measurements, in all, were made during the year.

14-16-17cb. NW $\frac{1}{4}$ NW $\frac{1}{4}$  sec. 17, T. 14 S., R. 16 W. Dug stock well, diameter 60 inches, depth 24.0 feet. Measuring point, top of board platform, 0.9 foot above land-surface datum.

Lincoln County

By D. W. Berry

The Federal Geological Survey, in cooperation with the Bureau of Reclamation, set up an observation-well program during April 1947, as part of the Wilson Reservoir project. Sixteen domestic and stock wells in the valley and adjacent uplands of the Saline River comprise this program. These wells tap either the alluvium of the valley or the Dakota of the uplands.

Periodic measurements of the water levels in the 16 wells by the wetted-tape method were started in April 1947, and 96 measurements, in all, were made during the year.

11-7-32dc. SW<sub>1</sub>SW<sub>4</sub> sec. 32, T. 11 S., R. 7 W. Drilled domestic well, diameter 6 inches, depth 97.5 feet. Measuring point, top of stone curb at pump base, 0.9 foot above land-surface datum.

#### Mitchell County

By D. W. Berry

The Federal Geological Survey, in cooperation with the Bureau of Reclamation, set up an observation-well program during November 1946, as part of the Glen Elder Reservoir project. This program consists of 12 wells in the valley of the Solomon River. These wells all tap the alluvium of the valley.

Periodic measurements of the water levels in the 12 wells by the wetted-tape method were started in November 1946, and 149 measurements, in all, were made during 1946 and 1947.

## MINNESOTA

By J. B. Cooper, W. E. Hale, and P. D. Akin

### PROGRAM OF WORK

Periodic measurements of water level were made in three wells in Minnesota in 1947. A total of 135 wetted-tape measurements was made during the year.

#### FLUCTUATIONS OF WATER LEVEL

The maximum amount of fluctuation during the year in the well in Brown County was 4.28 feet. The minimum depth to water occurred on April 16, when the reading of 3.67 feet below land-surface datum was made. The lowest recorded water level, 7.95 feet occurred on October 22. The year closed with water levels 1.33 feet lower than at the beginning of the year.

Weekly measurements of water level were also made in the other two wells, one near the town of Deer River, in Itasca County, the other at Eveleth, in St. Louis County.

# MISSOURI

By W. E. Hale, J. B. Cooper, and Phyllis T. Mosley

## PROGRAM OF WORK

Water-level measurements were made in Atchison County in 1947 as part of the Tarkio Creek Valley observation-well program organized by the Federal Geological Survey in 1934 in which the Soil Conservation Service of the United States Department of Agriculture participated for several years. The Atchison County section consisted of 14 wells in 1947 in which 140 single measurements were made by D. W. Knox, observer of the Tarkio Creek well program. The measurements of the observation well in Grundy County were continued on a weekly basis. W. H. Estes, owner of the Grundy County observation well, has been the observer since its establishment.

The water levels in the Phelps County wells were measured monthly by engineers from the Rolla office of the surface water branch through the courtesy of H. C. Bolon, district engineer. A total of 21 measurements was made in these two wells in 1947.

## FLUCTUATIONS OF WATER LEVEL

In the Grundy County well the maximum fluctuation of water level was 7.17 feet with the highest reading of 0.03 foot below land-surface datum occurring on June 21, and the lowest reading of 7.20 feet below land-surface datum occurring on January 12. The water level was 3.03 feet higher on December 28 than it was at the close of 1946. Fluctuations of water levels in wells in Atchison County, together with the other wells in the Tarkio Creek area, are discussed in the section of this volume that deals with Iowa.

## NEBRASKA

By H. A. Waite, W. K. Bach, and R. L. Schreurs

### PROGRAM OF WORK

The State-wide program of water-level measurements in observation wells in Nebraska, begun in 1934 in cooperation with the Conservation and Survey Division of the University of Nebraska, was continued in 1947. Records of water levels in the wells and some interpretation of the fluctuations of water levels are given in the annual reports of the Geological Survey on water levels and artesian pressure. The reports already published are Water-Supply Papers 777, 817, 840, 845, 886, 908, 938, 946, 988, 1018, 1025, and 1073.

Measurements of water levels made in 814 wells are given in the present report. Included in this group are 250 wells in the observation of which the following organizations are cooperating informally: Grand Island Water Department, 46 wells in Hall County and 1 in Merrick County; Fish and Wildlife Service, United States Department of the Interior, 9 wells in Garden County; Central Nebraska Public Power and Irrigation District, 1 well in Arthur County, 24 wells in Dawson County, 2 wells in Garden County, 23 wells in Gosper County, 53 wells in Keith County, 66 wells in Lincoln County, and 10 wells in Phelps County; Platte Valley Public Power and Irrigation District, 2 wells in Keith County and 12 wells in Lincoln County. Weekly tape measurements given for well 85, in Morrill County, were furnished by the Nebraska Department of Roads and Irrigation.

Automatic water-stage recorders were in operation on 18 wells. Of these, the following wells are equipped with 60-day continuous recorders:

- 1-11-11ba (near Red Cloud, Webster County)
- 1-40-29bb (near Haigler, Dundy County)
- 3-25-4bb (near Cambridge, Furnas County)
- 9-14-1dc (near Gibbon, Buffalo County)
- 11-11-25cc (near Alda, Hall County)

The remaining wells listed below, are equipped with 8-day recorders:

- 1-6-30dd (near Superior, Nuckolls County)
- 5-15-3ba (near Minden, Kearney County)
- 7-20-31bb (in Bertrand, Phelps County)
- 9-12-9ba (near Shelton, Hall County)
- 13-36-8cc) (near Korty, Keith County)  
13-36-9ad)
- 14-33-27da (near O'Fallons, Lincoln County)
- 17-16-26dc (near Arcadia, Valley County)
- 24-48-10bb)
- 24-48-13ba) (near Alliance, Box Butte County)  
25-48-14aa)
- 25-45-32ad (near Antioch, Sheridan County)
- 30-22-23da (near Ainsworth, Brown County)

The well near Superior is serviced by personnel of the Bureau of Reclamation at Superior. The well in Bertrand is serviced by M. R. Williams, city water commissioner. The two wells near Korty and the one near O'Fallons are serviced each week by Warren Doolittle of the Platte Valley Public Power and Irrigation District. The well near Ainsworth is serviced by personnel of the Bureau of Reclamation at Ainsworth.

Tables have been included showing the total monthly pumpage for the public supplies for the city of Grand Island and for the city of Lincoln at its well field near Ashland. Monthly measurements of the water level in well A13-9-24cc (US 62), just west of the Lincoln city well field near Ashland, are given under the heading Saunders County. This well is one of eight key wells in Nebraska and the water level in the well is measured by personnel of the Ashland pumping station.

Monthly measurements of the water levels in eight key wells in Nebraska were continued during 1947. Measurements from these wells form the basis of statements of water-level conditions in Nebraska that are published currently in the monthly Water Resources Review.

In all, exclusive of automatic water-stage recorder measurements, 4,136 individual measurements of water level were made in Nebraska in 1947.

## FLUCTUATIONS OF WATER LEVEL

The precipitation in Nebraska in 1947 was 23.35 inches, 0.79 inch above normal and 1.20 inches below that of 1946.

The following table summarizes for each observation well, the length of record in years, the highest and the lowest water level of record, the net change in water level in 1947, and the net change in water level during the entire period of record.

Length of record, in years, highest and lowest recorded water levels, in feet below land-surface datum, net change in water level in 1947, and net change in water level during the entire period of record in 741 wells in Nebraska

#### PUMPAGE

The following tables give the total pumpage for the public supplies of Lincoln and Grand Island. The public supply for the city of Lincoln is pumped from nine wells on the flood plain of the Platte River about 3 miles north of Ashland. The first pumping from the Lincoln well field near Ashland began in August 1932 and by the end of 1947 approximately 46,986.8 million gallons of water had been withdrawn from the ground-water reservoir. The public supply at Grand Island is obtained by pumping from a group of wells drilled into the Pleistocene sands and gravels of the Platte Valley and situated for the most part within the city.

Monthly pumpage, in millions of gallons, for public supply of Lincoln, Nebr., from well field north of Ashland, 1932-47

	1932	1933	1934	1935	1936	1937	1938	1939

a Does not include water pumped for condenser use at municipal electric plant.

#### WELL-NUMBERING SYSTEM

The following well-numbering system has been adopted in the Missouri Basin and is now being used in Nebraska. The State has been divided into two principal divisions. The numbers of those wells situated east of the sixth principal meridian, which passes through Columbus, are preceded by the capital letter A. Those west of Columbus have no preceding letter. The first number indicates the township, the second the range, and the third the section. The lower-case letters which follow the section number indicate the position of the well within the section, the first letter indicating the quarter section and the second letter the quarter-quarter section. The letters a, b, c, and d are applied counter-clockwise beginning with a in the northeast quadrant. The last numeral indicates the number of the well within the tract of land indicated by the last letter. No number is shown unless more than one well is situated within the given tract of land.

## WELL DESCRIPTIONS AND WATER-LEVEL MEASUREMENTS

Adams County

5-9-9dc. D. McClarry. Drilled irrigation well, diameter 18 inches, reported depth 142 feet. Measuring point, side of turbine, 1.2 feet above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 20, 37.70; Nov. 17, 37.52.

5-11-2bb. Dr. Neilson. Drilled irrigation well, diameter 18 inches, depth 170 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 24, 86.22.

5-11-10bc (\*1073, p. 182). University of Nebraska. Highest observed stage in period of record, 9.49 on Nov. 24, 1947. Water level, in feet below land-surface datum, 1947: Nov. 24, 9.49.

6-9-4cb. J. Larson. Drilled irrigation well, diameter 18 inches, reported depth 145 feet. Measuring point, turbine base, at land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 103.40.

6-10-8ac. F. Hageman. Drilled irrigation well, diameter 18 inches, reported depth 193 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 24, 90.55.

6-10-23bb (\*886, p. 289; 908, p. 188; 938, p. 157; 946, p. 189; 988, p. 187; 1018, p. 163; 1025, p. 158; \*1073, p. 183). University of Nebraska. Water level, in feet below land-surface datum, 1947: Nov. 24, 9.08.

7-10-26da. R. Dougherty. Drilled irrigation well, diameter 18 inches, reported depth 186 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 24, 114.05.

7-11-3cb. V. Katzberg. Drilled irrigation well, diameter 18 inches, reported depth 182 feet. Measuring point, turbine base, at land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 112.19.

7-11-22ad. V. Anderson. Drilled irrigation well, diameter 18 inches, reported depth 182 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Aug. 15, 120.60.

7-12-15ca. R. Karr. Drilled irrigation well, diameter 18 inches, reported depth 180 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 98.05.

7-12-24cc. Groff. Drilled irrigation well. Measuring point, side of turbine, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 99.02.

8-9-5cc. C. Hagerroad. Drilled irrigation well, diameter 18 inches, reported depth 185 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 13, 92.12.

8-9-14aa. C. Anderson. Drilled irrigation well, diameter 18 inches, reported depth 152 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 13, 109.60.

8-10-25bb. H. Barchers. Drilled irrigation well, diameter 18 inches, reported depth 158 feet. Measuring point, hole in side of turbine, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 13, 110.88.

8-10-29ab. J. Junkers. Drilled irrigation well, diameter 18 inches, reported depth 190 feet. Measuring point, turbine base, 1.5 feet above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 13, 120.00.

8-11-13aa. E. Kent. Drilled irrigation well, diameter 14 inches, reported depth 152 feet. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 14, 92.68; Nov. 13, 92.06.

8-12-8ab (\*1073, p. 183). E. Woodman. Altitude 2,010.14 feet above sea level. Lowest observed stage in period of record, 7.68 on July 16, 1947.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Jan. 10	8.23	May 14	8.05	Sept. 11	8.70
Mar. 19	8.33	July 16	7.68	Nov. 7	8.85

8-12-22db. N. Long. Drilled irrigation well, diameter 24 inches, reported depth 130 feet. Measuring point, lower edge of discharge pipe, 3.0 feet above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 13, 84.10; Nov. 17, 83 <sup>11</sup>

Brown County

29-21-6cd. Libby Deer. Drilled irrigation well, diameter 6 inches, depth 85 feet. Measuring point, top of concrete curb, at land-surface datum. Highest observed stage in period of record, 5.0 in November 1944; lowest, 9.0 on June 17, 1945. Measurement in November 1944 by O. J. Scherer, geologist, Soil Conservation Service, U. S. Dept. of Agriculture, Lincoln. Measurement on June 17, 1945, by M. F. Skinner, Ainsworth, and on Dec. 16, 1947, by personnel of the Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum: Nov. 1944, 5.0; June 17, 1945, 9.0; Nov. 14, 1947, 5.80; Dec. 16, 1947, 5.55.

29-21-7ab. Libby Deer. Drilled stock well, diameter 4 inches. Measuring point, hole in side of pump base, 1.8 feet above land-surface datum. Measurement of Dec. 16, 1947, by personnel of the Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 13, 4.62; Dec. 16, 3.92.

29-22-4ab. Abandoned domestic well, diameter 4½ inches, depth 29 feet. Measuring point, top of casing, 1.1 feet above land-surface datum. Highest observed stage in period of record, 0.90 in Nov. 1944; lowest, 3.12 on Nov. 13, 1947. Measurement in Nov. 1944 by O. J. Scherer, geologist, Soil Conservation Service, U. S. Dept. of Agriculture, Lincoln. Measurement on Dec. 16, 1947, by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum: Nov. 1944, 0.90; Nov. 13, 1947, 3.12; Dec. 16, 1947, 2.48.

30-21-15cd. Abandoned drilled well, diameter 6 inches, depth 76.5 feet. Measuring point, on side of concrete curb, at land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 15, 75.25; Dec. 16, 75.02.

30-21-18bc. Drilled domestic well, diameter 6 inches, depth 61 feet. Measuring point, top of casing, 3 feet below land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 15, 56.08; Dec. 16, 56.04.

30-21-19cc. City of Ainsworth. Abandoned drilled domestic well. Measuring point, hole in side of pump, 1.6 feet above land-surface datum. Measurement on Dec. 15 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainswcrth. Water levels, in feet below land-surface datum, 1947: Nov. 14, 38.29; Dec. 15, 39.79.

30-21-26bb. Drilled stock well, diameter 5 inches, depth 65 feet. Measuring point, top of casing, 1.2 feet above land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 16, 47.78; Dec. 16, 47.57.

30-21-30bc. Jay Fling. Drilled irrigation well, diameter 18 inches. Measuring point, hole in pump base, 0.2 foot below land-surface datum. Measurement on May 10 by M. F. Skinner, Ainsworth, and on Dec. 15 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Highest observed stage in period of record, 37.7 on May 10; lowest 37.09 on Dec. 15. Water levels, in feet below land-surface datum, 1947: May 10, 37.7; Nov. 14, 37.13; Dec. 15, 37.09.

30-22-15cc. Dean Clark. Drilled irrigation well, depth 70 feet. Measuring point, hole in pump base, 0.5 foot above land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 14, 42.18; Dec. 16, 41.92.

30-22-17cb. Clausen. Drilled irrigation well, diameter 18 inches. Measuring point, hole in pump base, 0.3 foot above land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 14, 45.12; Dec. 16, 46.05.

30-22-19aa. Drilled stock well, diameter 5 inches, depth 63 feet. Measuring point, top of casing, 0.5 foot above land-surface datum. Measurement on Dec. 16 by personnel of Bureau of Reclamation, U. S. Dept. of Interior, Ainsworth. Water levels, in feet below land-surface datum, 1947: Nov. 16, 38.20; Dec. 16, 38.11.

30-22-23dd. A. G. Rasek. Drilled irrigation well, diameter 24 inches, depth 68 feet. Measuring point, top of casing, 0.5 foot above land-surface datum. Stevens Type F, 8-day automatic water-stage recorder installed Dec. 10, 1947. Highest observed stage in period of record, 38.65 on Nov. 18, 1944; lowest 38.87 on Nov. 19, 1947.

Lowest daily water level, in feet below land-surface datum, 1944, 1947  
(From recorder charts)

Date	Water level	Date	Water level	Date	Water level

To convert water levels from feet above assumed datum, as published in previous reports, to feet below land-surface datum, subtract from 267.33. Lowest observed stage in period of record, 168.86 on Aug. 12. Water level, in feet below land-surface datum, 1947: Aug. 12, 168.86.

Frontier County

No measurements made in 1947.

Furnas County

1-25-6ba (\*817, p. 127; 840, p. 203; 845, p. 175; 886, p. 300; 908, p. 196; 946, p. 200; 988, p. 212; 1018, p. 181; 1025, p. 174; \*1073, p. 222). S. Shoemaker. No measurements made in 1947.

2-25-27cc (\*817, p. 128; 840, p. 203; 845, p. 175; 886, p. 300; 908, p. 197; 938, p. 163; 946, p. 200; 988, p. 212; 1018, p. 181; 1025, p. 174; \*1073, p. 222). E. Hunt. No measurements made in 1947.

2-25-28dc (\*817, p. 128; 840, p. 203; 845, p. 175; 886, p. 300; 908, p. 197; 946, p. 200; 988, p. 212; 1018, p. 181; 1025, p. 174; \*1073, p. 222). J. Loar. No measurements made in 1947.

3-21-2cc (\*1073, p. 222). Geological Survey, U. S. Dept. of Interior. Lowest observed stage in period of record, 10.32 on Oct. 9.

## Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Feb. 28	7.94	July 31	8.50	Dec. 7	10.17
June 9	8.14	Oct. 9	10.32		

3-21-9bd. Ralph Ballard. Drilled irrigation well, diameter 24 inches, depth 51 feet. Measuring point, hole in pump base, and 1.0 foot above land-surface datum. Highest observed stage in period of record, 13.82 on Dec. 17, 1946; lowest, 15.48 on June 9, 1947. Water levels, in feet below land-surface datum: Mar. 22, 1946, 14.75; Dec. 17, 1946, 13.82; Feb. 28, 1947, 15.40; June 9, 1947, 15.48.

3-21-12dc (\*1073, p. 222). Geological Survey, U. S. Dept. of Interior. Lowest observed stage in period of record, 6.70 on Oct. 9. Water levels, in feet below land-surface datum, 1947: Feb. 28, 3.97; June 9, 3.74; Oct. 9, 6.70; Dec. 2, 5.92.

3-22-2ba (\*1073, p. 222). Highest observed stage in period of record, 4.78 on July 28, lowest, 8.49 on Dec. 3.

## Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Feb. 24	6.06	July 28	4.78	Dec. 3	8.49
June 5	4.97	Oct. 6	7.95		

3-23-34cc (\*817, p. 127; 840, p. 202; 845, p. 175; 886, p. 299; 908, p. 196; 938, p. 163; 946, p. 200; 988, p. 121; 1018, p. 212; 1025, p. 173; \*1073, p. 222). H. Lambert. No measurements made in 1947.

3-25-4bb (\*1073, p. 222). Geological Survey, U. S. Dept. of Interior. Highest observed stage in period of record, 4.12 on June 23.

Lowest daily water level, in feet below land-surface datum, 1947

a Measurement by Geological Survey.

11-9-27cb (\*817, p. 131; 840, p. 205; 845, p. 176; 886, p. 306; 908, p. 203; 938, p. 166; 946, p. 203; \*988, p. 223; 1073, p. 238). University of Nebraska. Water levels, in feet below land-surface datum, 1947: Jan. 10, 6.79; Mar. 7, 6.96. Well destroyed and replaced by 11-9-27bc.

11-9-28ba (\*836-E, pp. 253, 278; p. 315; 908, p. 205; 938, p. 168; 946, p. 207; \*988, p. 229; 1018, p. 191; 1025, p. 183; \*1073, p. 238). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Water levels, in feet below land-surface datum, 1947: Mar. 17, 13.65; July 14, 14.00; Nov. 3, 13.66.

11-9-29bb (\*836-E, pp. 253, 278; 886, p. 316; 908, p. 205; 938, p. 168; 946, p. 207; \*988, p. 229; 1018, p. 191; 1025, p. 183; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 19.16 on July 14. Water levels, in feet below land-surface datum, 1947: Mar. 17, 21.83; July 14, 19.16; Nov. 3, 19.66.

11-9-32cc (\*836-E, pp. 253, 278; 886, p. 316; 908, p. 205; 938, p. 168; 946, p. 207; \*988, p. 229; 1018, p. 191; 1025, p. 183; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Water levels, in feet below land-surface datum, 1947: Mar. 17, 3.34; July 14, 2.25; Nov. 3, 4.75.

11-9-34aa (\*836-E, pp. 253, 278; 886, p. 316; 908, p. 205; 938, p. 168; 946, p. 207; \*988, p. 229; 1018, p. 191; 1025, p. 184; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Water levels, in feet below land-surface datum, 1947: Mar. 17, 4.42; July 14, 3.58; Nov. 3, 5.25.

11-9-34cb (\*836-E, pp. 253, 279; 886, p. 316; 908, p. 205; 938, p. 168; 946, p. 208; \*988, p. 229; 1018, p. 191; 1025, p. 184; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Water levels, in feet below land-surface datum, 1947: Mar. 17, 4.58; July 14, 2.92; Nov. 3, 5.58.

11-9-35dc (\*836-E, pp. 253, 279; 886, p. 317; 908, p. 205; 938, p. 168; 946, p. 208; \*988, p. 229; 1018, p. 191; 1025, p. 184; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 2.08 on July 14. Water levels, in feet below land-surface datum, 1947: July 14, 2.08; Nov. 3, 4.66.

11-10-1cc (erroneously reported as 12-10-1cc in previous reports) (\*836-E, pp. 253, 280; 886, p. 318; 908, p. 206; 938, p. 168; 946, p. 208; \*988, p. 230; 1018, p. 192; 1025, p. 184; \*1073, p. 242). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 5.08 on July 14. Water levels, in feet below land-surface datum, 1947: Mar. 6, 6.83; July 14, 5.08; Nov. 3, 5.25.

11-10-1ldc (\*836-E, pp. 253, 280; 886, p. 318; 908, p. 206; 938, p. 168; 946, p. 208; \*988, p. 230; 1018, p. 192; 1025, p. 184; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 5.00 on July 14. Water levels, in feet below land-surface datum, 1947: Mar. 17, 6.75; July 14, 5.00; Nov. 3, 5.83.

11-10-13ab (\*836-E, pp. 253, 280; 886, p. 318; 908, p. 206; 938, p. 168; 946, p. 208; \*988, p. 230; 1018, p. 192; 1025, p. 184; \*1073, p. 239). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 8.00 on July 14. Water levels, in feet below land-surface datum, 1947: Mar. 17, 9.83; July 14, 8.00; Nov. 3, 8.92.

11-10-14dd (\*1073, p. 240). H. Thomas. Altitude 1,877. 59 feet above sea level. Highest observed stage in period of record, 9.15 on July 10.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Jan. 6	10.47	May 8	10.50	Sept. 5	9.60
Mar. 7	10.82	July 10	9.15	Nov. 3	9.72

11-10-16bb (\*1073, p. 240). Geological Survey, U. S. Dept. of Interior. Altitude 1,893.50 feet above sea level. Highest observed stage in period of record, 9.79 on July 10 and Sept. 5.

Water level, in feet below land-surface datum, 1947

Jan. 6	10.40	July 10	9.79	Nov. 3	9.80
May 8	10.44	Sept. 5	9.79		

11-10-24cb (\*836-E, pp. 253, 280; 886, p. 318; 908, p. 206; 938, p. 168; 946, p. 208; \*988, p. 230; 1018, p. 192; 1025, p. 184; \*1073, p. 240). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Highest observed stage in period of record, 12.66 on July 14. Water levels, in feet below land-surface datum, 1947: Mar. 17, 14.66; July 14, 12.66; Nov. 3, 13.16.

11-10-26dd (\*836-E, pp. 253, 280; 886, p. 319; 908, p. 206; 938, p. 168; 946, p. 208; \*988, p. 230; 1018, p. 192; 1025, p. 184; \*1073, p. 240). City of Grand Island. Measurements supplied through courtesy of Grand Island Water Department. Water levels, in feet below land-surface datum, 1947: Mar. 17, 6.83; July 14, 5.66; Nov. 3, 7.66.

11-10-27dc (\*1073, p. 240). Geological Survey, U. S. Dept. of Interior. Altitude 1,896.22 feet above sea level. Highest observed stage in period of record, 15.43 on Sept. 5.

Water level, in feet below land-surface datum, 1947.

Jan. 6	16.88	May 8	16.73	Sept. 5	15.43
Mar. 7	16.91	July 10	15.79	Nov. 3	16.00

11-11-25cc (\*1073, p. 240). Geological Survey, U. S. Dept. of Interior. Altitude 1,924.0 feet above sea level.

Lowest daily water level, in feet below land-surface datum, 1947

#### Jefferson County

No measurements made in 1947.

#### Johnson County

No measurements made in 1947.

#### Kearney County

5-13-33cc. Chris Raun. Drilled irrigation well, diameter 18 inches, reported depth 245 feet. Measuring point, turbine base, at land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 24, 138.92.

5-14-16cb. Nels Peterson. Drilled irrigation well, diameter 18 inches, depth 255 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 11, 142.18; Nov. 24, 142.03.

5-15-3ba. Leland Thomsen. Abandoned drilled domestic well, diameter 6 inches, depth 122 feet. Measuring point, edge of casing, 1.0 foot above land-surface datum. Stevens Type F, 8-day automatic water-stage recorder installed Sept. 17, 1947. Highest observed stage in period of record, 105.29 on Dec. 29; lowest, 108.15 on Aug. 8.

5-15-3ba--Continued.

Lowest daily water level, in feet below land-surface datum, 1947

a Tape measurement.

5-16-17bb. Louis Meyers Estate. Drilled irrigation well, diameter 18 inches, depth 15.3 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 16, 91.95.

5-16-30da. R. R. Caswell. Drilled irrigation well, diameter 18 inches, depth 172 feet. Measuring point, turbine base, 0.8 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 6, 136.50; Nov. 18, 136.80.

6-13-16db. V. Youngson. Drilled irrigation well, diameter 18 inches, reported depth 171 feet. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 13, 89.42; Nov. 24, 88.83.

6-14-4dc. J. Olson. Drilled irrigation well, diameter 18 inches, reported depth 174 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 80.59.

6-14-21bb. P. Peterson. Drilled irrigation well, diameter 18 inches. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 11, 107.22; Nov. 24, 106.28.

6-15-22dc. R. Rogers. Drilled irrigation well, diameter 18 inches. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 81.32.

6-15-35cc. J. Stadler. Drilled irrigation well, diameter 18 inches, depth 190 feet. Measuring point, turbine base, 1.0 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 8, 113.59; Nov. 14, 112.50.

6-16-20bb1 (\*817, p. 140; 840, p. 208; 845, p. 177; 886, p. 321; 908, p. 208; 938, p. 170; 946, p. 211; 988, p. 232; 1018, p. 195; 1025, p. 187; \*1073, p. 249). E. Carlson. Highest observed stage in period of record, 87.07 on Nov. 19. Water levels, in feet below land-surface datum, 1947: June 17, 88.39; Sept. 9, 87.68; Nov. 19, 87.07.

6-16-20bb2. L. Tilbury. Drilled irrigation well, diameter 18 inches, depth 166 feet. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 5, 100.15; Nov. 19, 99.24.

6-16-25cb. H. Lorenzen. Drilled irrigation well, diameter 24 inches, depth 180 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 99.89.

6-16-30da. G. Anderson. Drilled irrigation well, diameter 18 inches, depth 152 feet. Measuring point, hole in side of base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Aug. 6, 89.52.

7-13-14cc. F. Pantenberg. Abandoned domestic well, diameter 2 inches, depth 100 feet. Measuring point, edge of concrete foundation, 1.8 feet above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 13, 64.02; Nov. 17, 65.38.

7-13-20aa. C. Gleason. Drilled irrigation well, diameter 18 inches, depth 168 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Nov. 17, 56.67.

7-14-28cb. O. Warp. Drilled irrigation well, diameter 18 inches, reported depth 142 feet. Measuring point, turbine base, 0.5 foot above land-surface datum. Water level, in feet below land-surface datum, 1947: Aug. 8, 77.66.

7-15-11ad. H. Hokser. Drilled irrigation well, diameter 14 inches, reported depth 71 feet. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 7, 34.92; Nov. 24, 35.07.

7-16-8dc. J. Kring Estate. Drilled irrigation well, diameter 14 inches, reported depth 59 feet. Measuring point, lower edge of discharge pipe, 5.4 feet from land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 7, 18.93; Nov. 24, 18.68.

7-16-11dd. H. Black. Drilled irrigation well, diameter 18 inches. Measuring point, turbine base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 7, 27.61; Nov. 24, 27.22.

8-13-12cb (\*1073, p. 249). O. H. Holl. Altitude 2,024.75 feet above sea level.

Water level, in feet below land-surface datum, 1947

13-37-3ab (\*817, p. 142; 840, p. 209; 845, p. 177; 886, p. 321; 908, p. 208; 938, p. 170; 946, p. 211; \*988, p. 233; 1018, p. 196; 1025, p. 187; 1073, p. 251). Water levels, in feet below land-surface datum, 1947: Oct. 2, 15.43; Nov. 6, 15.80; Dec. 13, 14.95.

13-37-5aa (\*908, p. 217; 938, p. 173; 946, p. 214; \*988, p. 256; 1018, p. 203; 1025, p. 195; \*1073, p. 251). Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 9.70; Dec. 3, 11.80.

13-38-3ba (\*908, p. 216; 938, p. 173; 946, p. 214; \*988, p. 256; 1018, p. 203; 1025, p. 195; \*1073, p. 252). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 11.50; Dec. 3, 13.80.

13-38-6dc (\*988, p. 257; 1018, p. 204; 1025, p. 196; \*1073, p. 252). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 26, 13.00; Dec. 3, 13.70.

13-39-10cc (\*988, p. 256; 1018, p. 203; 1025, p. 195; \*1073, p. 252). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 26, 3.80; Dec. 3, 4.70.

13-39-34dd (\*817, p. 132; 840, p. 209; 845, p. 178; 886, p. 322; 908, p. 209; 938, p. 170; 946, p. 212). G. Peters Estate. No measurements made in 1947.

13-40-19cd (\*817, p. 143; 840, p. 209; 845, p. 178; 886, p. 322; 908, p. 209; 938, p. 170). G. McGinely. No measurements made in 1947.

14-35-13bb (\*988, p. 239; 1018, p. 197; 1025, p. 189; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 3.70; Dec. 3, 4.40.

14-35-16db (\*988, p. 238; 1018, p. 197; 1025, p. 189; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 5.90; Dec. 3, 7.30.

14-35-24da (\*988, p. 240; 1018, p. 198; 1025, p. 190; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 4.80; Dec. 3, 4.20.

14-35-27aa (\*988, p. 229; 1018, p. 198; 1025, p. 190; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 5.10; Dec. 3, 5.30.

14-35-28bb (\*988, p. 240; 1018, p. 198; 1025, p. 190; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Highest observed stage in period of record, 2.80 on June 25. Water levels, in feet below land-surface datum, 1947: June 25, 2.80; Dec. 3, 2.90.

14-36-8cb (\*988, p. 237; 1018, p. 197; 1025, p. 189; \*1073, p. 253). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 4.10; Dec. 1, 6.30; Dec. 30, 5.80.

14-36-15bb (\*988, p. 238; 1018, p. 197; 1025, p. 189; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 3.30; Dec. 1, 5.80; Dec. 30, 2.80.

14-37-4ad (\*988, p. 236; 1018, p. 197; 1025, p. 189; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 4.10; Dec. 1, 5.80; Dec. 30, 5.90.

14-37-5ab (\*988, p. 236; 1018, p. 197; 1025, p. 188; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 4.30; Dec. 1, 5.90; Dec. 30, 6.10.

14-37-5bb (\*988, p. 235; 1018, p. 196; 1025, p. 188; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 2.80; Dec. 1, 4.60; Dec. 30, 3.90.

14-37-11bb (\*988, p. 237; 1018, p. 197; 1025, p. 189; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Highest observed stage in period of record, 2.80 on June 24. Water levels, in feet below land-surface datum, 1947: June 24, 2.80; Dec. 1, 6.10; Dec. 30, 6.10.

14-37-12bb (\*988, p. 227; 1018, p. 197; 1025, p. 189; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 24, 3.00; Dec. 1, 4.70; Dec. 30, 4.30.

14-38-3cd (\*908, p. 213; 938, p. 172; 946, p. 213; \*988, p. 254; 1018, p. 202; 1025, p. 194; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. No measurements made in 1947.

14-38-3da (\*988, p. 240; 1018, p. 198; 1025, p. 190; \*1073, p. 254). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: July 3, 4.50; Dec. 4, 4.40.

14-38-7db (\*908, p. 214; 938, p. 172; 946, p. 213; \*988, p. 225; 1018, p. 202; 1025, p. 194; \*1073, p. 255). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Highest observed stage in period of record, 111.30 on Dec. 31. Water levels, in feet below land-surface datum, 1947: June 26, 118.90; Dec. 2, 111.60; Dec. 31, 111.30.

14-38-17ba (\*986, p. 323; 908, p. 214; 938, p. 172; 946, p. 213; \*988, p. 255; 1018, p. 202; 1025, p. 194; \*1073, p. 255). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Highest observed stage in period of record, 144.50 on Dec. 4. Water levels, in feet below land-surface datum, 1947: June 26, 147.30; Dec. 4, 144.50.

Mar. 17	11.44	July 13	11.22	13	b12.19	Dec. 11	b11.19

a Measurements supplied through courtesy of Platte Valley Public Power and Irrigation District.

b Measurement supplied through courtesy of Central Nebraska Public Power and Irrigation District.

13-30-21cd. University of Nebraska. Drilled observation well, diameter 3 inches, depth 54 feet. Measuring point, top of casing, 0.5 foot above land-surface datum, 2,869.84 feet above sea level. Measurements supplied through courtesy of Platte Valley Public Power and Irrigation District. Highest observed stage in period of record, 40.10 on Nov. 25; lowest, 41.20 on Jan. 20.

Water level, in feet below land-surface datum, 1947

Jan. 20	41.20	Mar. 27	40.90	June 13	40.90	Sept. 10	40.60
Feb. 25	40.90	May 15	40.85	July 24	40.75	Nov. 25	40.10

13-30-25bb (\*#817, p. 147; 840, p. 211; 845, p. 178; 886, p. 325; 908, p. 219; 938, p. 175; 946, p. 216; 988, p. 260; 1018, p. 206; 1025, p. 198; \*#1073, p. 270). Lech Bros. To convert water levels from feet above assumed datum, as published in previous reports, to feet below land-surface datum, subtract from 147.28. Measurements supplied through courtesy of Platte Valley Public Power and Irrigation District. Highest observed stage in period of record, 33.70 on Dec. 24. Water levels, in feet below land-surface datum, 1947: Jan. 10, 34.20; Mar. 19, 33.90; Dec. 24, 33.70.

13-34-32da (\*#808, p. 220; 938, p. 175; 946, p. 217; \*#888, p. 267; 1018, p. 209; 1025, p. 201; \*#1073, p. 270). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 13.30; Dec. 3, 12.90.

14-30-8cb (\*#888, p. 265; 1018, p. 208; 1025, p. 200; \*#1073, p. 270). Central Nebraska Public Power and Irrigation District. Measurements supplied through courtesy of Central Nebraska Public Power and Irrigation District. Water levels, in feet below land-surface datum, 1947: June 25, 2.10; Dec. 3, 2.90.

14-30-9ca (\*#1073, p. 270). Geological Survey, U. S. Dept. of Interior. Measurements supplied through courtesy of Platte Valley Public Power and Irrigation District. Highest observed stage in period of record, 2.55 on June 13.

a Tape measurement.

1-6-31cc. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter 1 $\frac{1}{4}$  inches, depth 13 feet. Measuring point, top of pipe, 0.5 foot above land-surface datum, and 1,547.11 feet above sea level. Highest observed stage in period of record, 9.69 on Oct. 13; lowest, 10.47 on Dec. 16. Water levels, in feet below land-surface datum, 1947: Oct. 13, 9.69; Nov. 14, 10.23; Dec. 16, 10.47.

1-6-33cb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter 1 $\frac{1}{4}$  inches, depth 11.55 feet. Measuring point, top of pipe, 1.7 feet above land-surface datum, and 1,538.85 feet above sea level. Water levels, in feet below land-surface datum, 1947: Oct. 13, 5.02; Nov. 14, 4.91; Dec. 16, 5.02.

1-6-33cc. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 18.74 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum, 1,541.60 feet above sea level. Highest observed stage in period of record, 11.90 on Oct. 13; lowest, 12.64 on Dec. 16. Water levels, in feet below land-surface datum, 1947: Oct. 13, 11.90; Nov. 14, 12.41; Dec. 16, 12.64.

1-6-35cb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 21 feet. Measuring point, top of pipe, 2.0 feet above land-surface datum, and 1,544.37 feet above sea level. Highest observed stage in period of record, 13.17 on Oct. 13; lowest, 14.03 on Dec. 16. Water levels, in feet below land-surface datum, 1947: Oct. 13, 13.17; Nov. 14, 13.61; Dec. 16, 14.03.

1-6-35cc (\*1073, p. 280). Geological Survey, U. S. Dept. of Interior. Altitude 1,534.25 feet above sea level. Lowest observed stage in period of record, 13.39 on Dec. 16.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Mar. 1	10.59	Aug. 2	10.15	Nov. 14	13.23
June 10	10.31	Oct. 13	13.35	Dec. 16	13.39

1-7-19cb (\*1073, p. 280). Geological Survey, U. S. Dept. of Interior. Altitude 1,589.79 feet above sea level. Highest observed stage in period of record, 7.30 on Aug. 2; lowest, 10.92 on Dec. 15.

Water level, in feet below land-surface datum, 1947

Mar. 1	8.36	Aug. 2	7.30	Nov. 13	10.76
June 10	8.28	Oct. 13	10.36	Dec. 15	10.92

1-7-19dd. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 13.4 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,578.40 feet above sea level. Highest observed stage in period of record, 6.82 on Dec. 15; lowest, 7.77 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 7.77; Nov. 13, 7.49; Dec. 15, 6.82.

1-7-27cb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 27.0 feet. Measuring point, is 1.0 foot above land-surface datum and 1,585.07 feet above sea level. Water levels, in feet below land-surface datum, 1947: Oct. 13, 20.59; Nov. 13, 20.58; Dec. 15, 20.56.

1-7-31da. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 22.0 feet. Measuring point, top of pipe, 1.50 feet above land-surface datum and 1,582.40 feet above sea level. Water levels, in feet below land-surface datum, 1947: Oct. 13, 10.64; Nov. 13, 10.92; Dec. 15, 10.97.

1-7-32bb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 12.8 feet. Measuring point, top of pipe, 2.0 feet above land-surface datum and 1,575.39 feet above sea level. Highest observed stage in period of record, 4.59 on Oct. 13; lowest, 3.66 on Dec. 16. Water levels, in feet below land-surface datum, 1947: Oct. 13, 4.59; Nov. 13, 4.29; Dec. 16, 3.66.

1-7-33ad. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 12.0 feet. Measuring point, top of pipe, 2.0 feet above land-surface datum and 1,575.39 feet above sea level. Highest observed stage in period of record, 6.10 on Dec. 15; lowest, 6.31 on Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 6.22; Nov. 13, 6.31; Dec. 15, 6.10.

1-7-33dd. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 17.7 feet. Measuring point, top of pipe, 1.2 feet above land-surface datum and 1,566.13 feet above sea level. Highest observed stage in period of record, 9.08 on Dec. 16, lowest, 9.39 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 9.39; Nov. 13, 9.33; Dec. 16, 9.08.

1-7-34bb (\*1073, p. 280). Geological Survey, U. S. Dept. of Interior. Altitude 1,567.91 feet above sea level. Lowest observed stage in period of record, 7.40 on Oct. 13.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Mar. 1	3.84	Aug. 2	4.98	Nov. 13	7.05
June 10	3.89	Oct. 13	7.40	Dec. 15	6.38

1-7-35da (\*1073, p. 280). Geological Survey, U. S. Dept. of Interior. Altitude 1,553.41 above sea level. Highest observed stage in period of record, 5.55 on Aug. 2.

Water level, in feet below land-surface datum, 1947

Mar. 1	8.06	Aug. 2	5.55	Nov. 14	7.61
June 10	7.78	Oct. 13	7.32	Dec. 16	8.05

1-7-36cc (\*886, p. 329; 908, p. 228; 938, p. 179; 946, p. 222; 988, p. 240; 1018, p. 218; 1025, p. 212; \*1073, p. 280). University of Nebraska. No measurements made in 1947.

1-7-36da. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 17.2 feet. Measuring point, top of pipe, 1.5 feet above land-surface datum and 1,548.79 feet above sea level. Highest observed stage in period of record, 10.00 on Oct. 13; lowest, 11.20 on Dec. 16. Water levels, in feet below land-surface datum, 1947: Oct. 13, 10.00; Nov. 14, 10.75; Dec. 16, 11.20.

1-8-7bb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 21.0 feet. Measuring point is 2.0 feet above land-surface datum and 1,631.79 feet above sea level. Highest observed stage in period of record, 5.57 on Dec. 15; lowest, 6.96 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 6.96; Nov. 13, 6.28; Dec. 15, 5.57.

1-8-7dd (\*1073, p. 280). Geological Survey, U. S. Dept. of Interior. Altitude 1,611.31 feet above sea level. Highest observed stage in period of record, 1.36 on June 10; lowest, 6.17 on Oct. 13.

Water level, in feet below land-surface datum, 1947

Mar. 1	3.05	Aug. 2	4.59	Nov. 13	5.86
June 10	1.36	Oct. 13	6.17	Dec. 15	5.57

1-8-14cb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 21.2 feet. Measuring point, top of pipe, 2.0 feet above land-surface datum and 1,614.36 feet above sea level. Highest observed stage in period of record, 15.57 on Dec. 15; lowest, 15.98 on Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 15.82; Nov. 13, 15.98; Dec. 15, 15.57.

1-8-17aa. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 13 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,607.98 feet above sea level. Highest observed stage in period of record, 5.53 on Dec. 15; lowest, 6.53 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 6.53; Nov. 13, 6.49; Dec. 15, 5.53.

1-8-17da. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 13.0 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,614.36 feet above sea level. Highest observed stage in period of record, 7.21 on Dec. 15; lowest, 7.56 on Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 7.51; Nov. 13, 7.56; Dec. 15, 7.21.

1-8-18cc. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 20.0 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,621.37 feet above sea level. Highest observed stage in period of record, 12.87 on Oct. 13; lowest, 13.20 on Dec. 15. Water levels, in feet below land-surface datum, 1947: Oct. 13, 12.87; Nov. 13, 13.12; Dec. 15, 13.20.

1-8-21cb. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 19.0 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,609.81 feet above sea level. Highest observed stage in period of record, 12.22 on Dec. 13; lowest, 12.41 on Oct. 13 and Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 12.41; Nov. 13, 12.41; Dec. 13, 12.22

1-8-21dc (\*1073, p. 280). K. Teachworth. Altitude 1,621.29 feet above sea level. Highest observed stage in period of record, 24.52 on Aug. 2; lowest 28.19 on Dec. 15.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Mar. 1	26.02	Aug. 2	24.52	Nov. 13	27.84
June 10	24.92	Oct. 13	27.69	Dec. 15	28.19

1-8-22ab (\*1073, p. 280). L. Smith. Altitude 1,592.57 feet above sea level. Lowest observed stage in period of record, 5.56 on Oct. 13.

Water level, in feet below land-surface datum, 1947

Date	Water level	Date	Water level	Date	Water level
Mar. 1	4.71	Aug. 2	3.95	Nov. 13	5.06
June 10	2.70	Oct. 13	5.56	Dec. 15	4.83

1-8-22ad. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 17.1 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,594.68 feet above sea level. Highest observed stage in period of record, 9.37 on Dec. 15; lowest, 10.05 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 10.05; Nov. 13, 9.75; Dec. 15, 9.37.

1-8-22dd. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 13.0 feet. Measuring point, top of pipe, 0.5 foot above land-surface datum and 1,591.91 feet above sea level. Highest observed stage in period of record, 8.41 on Oct. 13; lowest, 8.54 on Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 8.41; Nov. 13, 8.54; Dec. 15, 8.50.

1-8-25aa. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 13.0 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum and 1,581.64 feet above sea level. Highest observed stage in period of record, 6.64 on Oct. 13 and Dec. 15; lowest, 6.75 on Nov. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 6.64; Nov. 13, 6.75; Dec. 15, 6.64.

1-8-25ad. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 17.7 feet. Measuring point, top of pipe, 1.5 feet above land-surface datum and 1,584.59 feet above sea level. Highest observed stage in period of record, 9.88 on Dec. 15; lowest, 10.50 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 10.50; Nov. 13, 10.25; Dec. 15, 9.88.

1-8-36aa. Geological Survey, U. S. Dept. of Interior. Driven observation well, diameter  $1\frac{1}{4}$  inches, depth 18.5 feet. Measuring point, top of pipe, 1.0 foot above land-surface datum. Highest observed stage in period of record, 11.42 on Dec. 16; lowest, 12.17 on Oct. 13. Water levels, in feet below land-surface datum, 1947: Oct. 13, 12.17; Nov. 13, 11.94; Dec. 16, 11.42.

2-5-8dd (\*817, p. 152; 840, p. 215; 845, p. 180; 886, p. 329; 908, p. 228; 938, p. 179; 946, p. 222; 988, p. 290; 1018, p. 217; 1025, p. 211; \*1073, p. 281). E. Dillon. No measurements made in 1947.

4-7-26aa (\*817, p. 152; 840, p. 215; 845, p. 180; 886, p. 329; 908, p. 228; 938, p. 179; 946, p. 222; 988, p. 290; 1018, p. 217; 1025, p. 212; \*1073, p. 281). W. Statz. No measurements made in 1947.

Otoe County

A7-12-35aa (\*817, p. 153; 840, p. 215; 845, p. 181; 886, p. 330; 908, p. 228; 938, p. 180; 946, p. 222; 988, p. 290; 1018, p. 218; 1025, p. 212; \*1073, p. 281). L. Damme: No measurements made in 1947.

A8-10-3bb (\*817, p. 222; 988, p. 290; 1018, p. 218; 1025, p. 212; \*1073, p. 281). University of Nebraska. Highest observed stage in period of record, 1.20 on June 25. Water level, in feet below land-surface datum, 1947: June 25, 1.20.

A8-11-7cc (\*817, p. 152; 840, p. 215; 845, p. 181; 886, p. 330; 908, p. 228; 938, p. 180; 946, p. 222; 988, p. 290; 1018, p. 218; 1025, p. 212; \*1073, p. 281). W. Gellerman. Highest observed stage in period of record, 1.30 on June 25. Water level, in feet below land-surface datum, 1947: June 25, 1.30.

Pawnee County

No measurements made in 1947.

Perkins County

No measurements made in 1947.

Phelps County

5-18-2cc. C. M. Brown. Drilled irrigation well, diameter 18 inches, depth 185 feet. Measuring point, base of pump, 0.50 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: July 25, 159.17; Nov. 26, 159.17.

5-18-4ab (\*817, p. 153; 840, p. 215; 845, p. 181; 886, p. 330; 908, p. 228; 938, p. 180; 946, p. 22; 988, p. 290; 1018, p. 219; 1025, p. 213; \*1073, p. 281). Western Public Service Co. No measurements made in 1947.

5-18-6ab. Christian Children's Home. Drilled irrigation well, diameter 16 inches, depth 258 feet. Measuring point, hole in pump base, 1.0 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: July 24, 159.57; Nov. 26, 158.92.

5-19-22da. Warp. Unused drilled well, diameter 12 inches, depth 246 feet. Measuring point, edge of concrete base, 1.50 feet above land-surface datum, 1947: July 24, 203.86; Nov. 18, 203.65.

5-19-35db. E. Gray. Drilled irrigation well, diameter 14 inches, depth 216 feet. Measuring point, hole in pump base, 1.0 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: July 24, 198.84; Nov. 18, 199.93.

6-17-15ad. Carl Ramste. Drilled irrigation well, diameter 18, depth 170 feet. Measuring point, hole in pump base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 6, 90.08; Nov. 19, 89.04.

6-18-12bc. Harley Welk. Drilled irrigation well, diameter 18 inches, depth 141 feet. Measuring point, hole in pump, 1.5 feet above land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 5, 89.92; Nov. 19, 89.63.

6-18-33aa. C. Burgesson. Drilled irrigation well, diameter 18 inches, depth 182 feet. Measuring point, hole in side of pump, 1.0 foot above land-surface datum. Water levels, in feet below land-surface datum, 1947: July 25, 137.42; Nov. 26, 137.27.

7-17-11cb. W. D. Just. Drilled irrigation well, diameter 18 inches, depth 60 feet. Measuring point, hole in side of pump, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 7, 28.78; Nov. 24, 28.25.

7-17-30bb. A. Solderholm. Drilled irrigation well, diameter 24 inches, depth 100 feet. Measuring point, hole in pump base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 5, 54.17; Nov. 19, 52.42.

7-18-27ab. R. J. Getty. Drilled irrigation well, diameter 24 inches, depth 114 feet. Measuring point, hole in pump base, at land-surface datum. Water levels, in feet below land-surface datum, 1947: Aug. 5, 64.15; Nov. 19, 52.42.

7-19-12cc. Central Nebraska Public Power and Irrigation District. Drilled observation well, diameter 1 inch, depth 91 feet. Measuring point, top of pipe, 1.0 foot below land-surface datum. Water levels, in feet below land-surface datum, 1947: July 24, 54.07; Nov. 18, 52.25.

7-20-31cd. E. Peterson. Abandoned drilled domestic well, diameter 6 inches, depth 241 feet. Measuring point, edge of casing, 0.8 foot above land-surface datum. Stevens Type F, 8-day automatic water-stage recorder installed Sept. 17, 1947. Highest observed stage in period of record, 222.76 on Dec. 29; lowest, 227.40 on Aug. 20.

Water level, in feet below land-surface datum, 1947

## NORTH DAKOTA

By J. E. Powell

### PROGRAM OF WORK

Ground-water investigations and the measurement of water levels in observation wells in North Dakota were continued in 1947 in cooperation with the North Dakota State Geological Survey and the North Dakota State Water Conservation Commission. At the end of 1947, water levels were being measured in 154 observation wells of which 10 were equipped with automatic water-stage recorders. Water levels in 22 wells were being measured weekly by local observers. Measurements were discontinued in nine wells. Records of a total of 1,163 water-level measurements are included in this report, and, in addition, 1,677 water-level determinations obtained from wells equipped with automatic water-stage recorders.

Field work was done in connection with studies of ground-water conditions in the vicinities of the towns of Minnewaukan, Michigan, New Rockford, Aneta, Hope, Sharon, Wimbleton, Kindred, Litchville, Wyndmere, Mohall, Flaxton, and Columbus, all in North Dakota, and in the Fargo-Moorhead area in Cass County, North Dakota, and Clay County, Minnesota. Reports on ground water conditions in the vicinities of Minot, Sharon, Buxton, and Aneta, were published in mimeographed form.

### PRECIPITATION

The average annual precipitation for North Dakota in 1947, as reported by the United States Weather Bureau, was 18.18 inches or, 1.06 inches above the 1892-1947 average. Departures from normal precipitation ranged from -5.25 inches to +6.98 inches at various stations in the State. The maximum positive departure from the normal occurred in the western and west-central parts of the State, and the greatest negative departure took place in the southeastern part of the State. In general, precipitation was below normal in the southern half of the State and above normal in the northern half. Average precipitation for the State was above normal

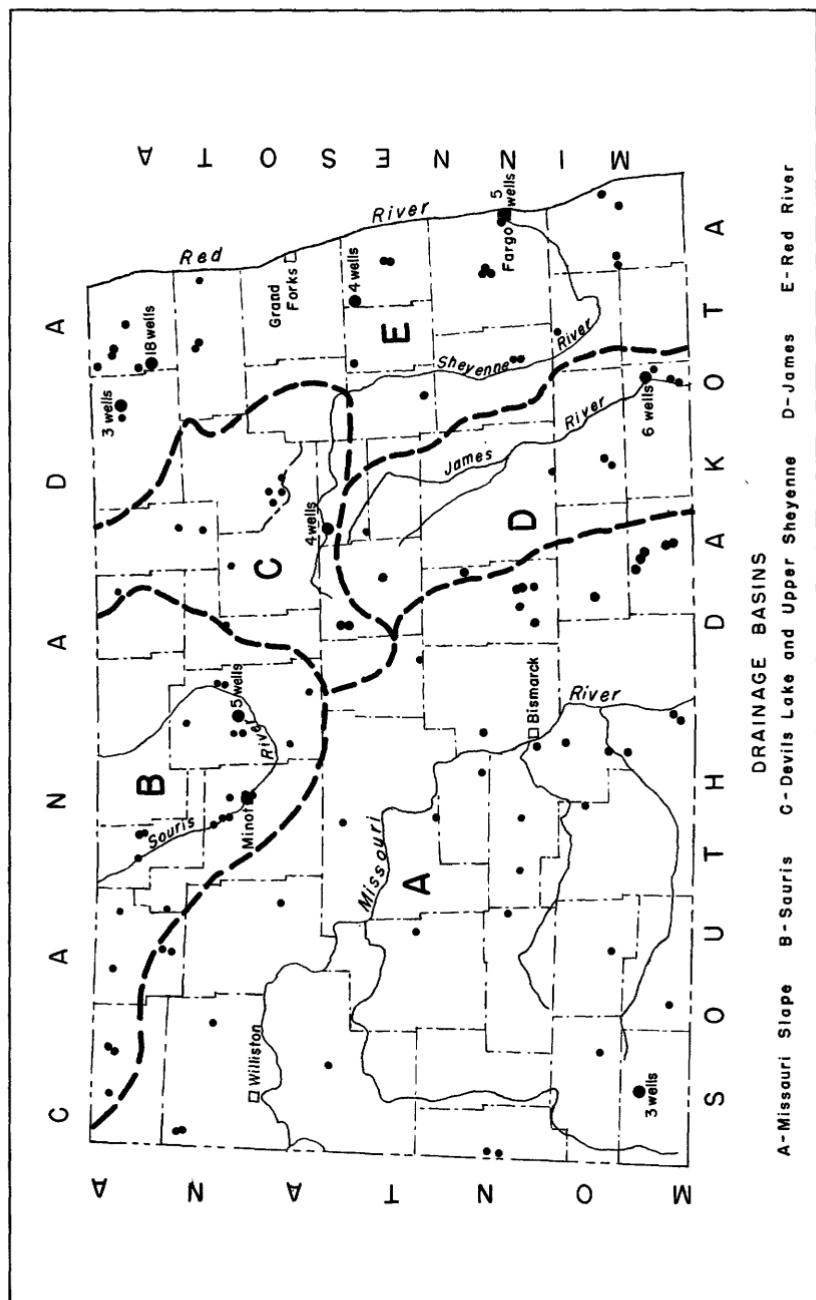

Figure 7.—Map of North Dakota showing drainage basins and distribution of observation wells at end of 1947.

during the months of April, June, August, October, and November. The greatest monthly departures were -1.17 inches in May and +2.29 inches in June.

#### FLUCTUATIONS OF WATER LEVEL

The average monthly water levels for the State from 1937 through 1947 are shown in the following table. These averages are based on water-level measurements in selected observation wells. The averages for 1947 were computed from records from 8 wells distributed throughout the State, and in which water levels were measured weekly. Three of these wells are in the Red River drainage basin, one in the Devils Lake region, one in the Souris River drainage basin and three in the Missouri River drainage basin. Figure 8 is a graphical presentation of these data.

Average monthly water levels, in feet above assumed datum planes, in observation wells in North Dakota, 1937-47

Year	Jan.	Feb.	Mar.	Apr.	May	June
1937						
1938	99.97	99.93	100.12	100.41	100.68	100.35

1945	101.04	100.96	101.06	101.49	101.74	101.71
1946	100.01	100.24	100.18	101.18	101.55	100.97
1947	100.48	100.49	100.33	101.35	101.74	102.25

Year	July	Aug.	Sept.	Oct.	Nov.	Dec.
1937			100.31	100.19	100.13	100.05
1938	99.99	99.61	99.59	99.44	99.51	99.54
1939	99.89	99.62	99.41	99.37	99.34	99.31
1940	99.34	99.24	99.07	98.96	98.95	98.92
1941	100.39	99.89	100.16	100.73	100.64	100.26
1942	101.42	101.48	101.48	101.35	100.98	100.73
1943	102.68	102.19	101.91	101.50	100.37	101.26
1944	101.28	101.37	101.67	101.36	101.55	101.59
1945	101.27	100.95	100.71	100.71	100.70	100.54
1946	100.60	100.36	100.07	100.70	100.84	100.67
1947	102.37	101.93	101.49	101.48	101.57	101.51

As in previous years, the water levels were low during the winter, the lowest stage of the year occurring in March. The water levels remained about the same during January and February, and declined slightly in March, but rose rapidly during April and May due to recharge from melting snow in conjunction with the thawing of the ground surface. The highest water levels of the year were attained in July, after which they declined until November, when there was a slight rise followed by a corresponding decline in December. At the end of 1947 the average water level was 0.84 foot higher than at the end of 1946.

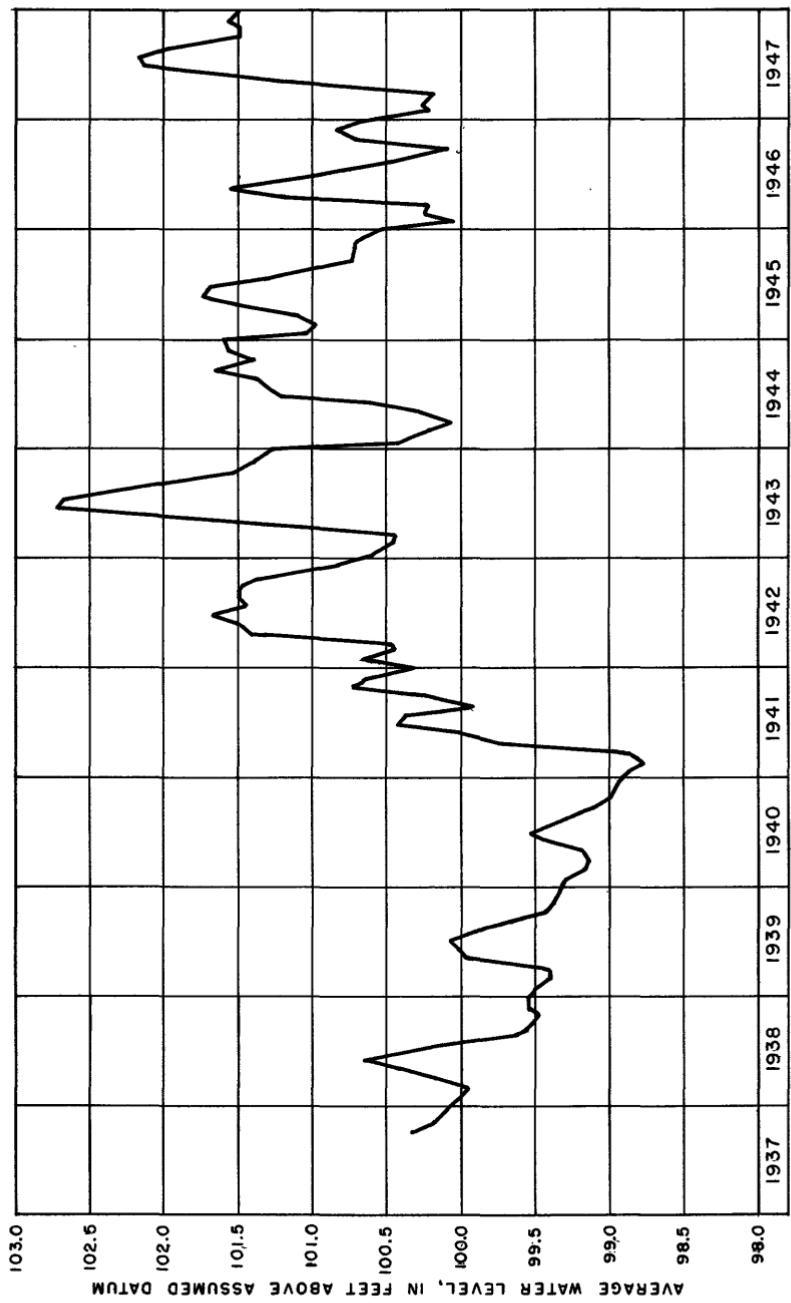

Figure 8.--Graph showing average monthly water level in 8 to 42 selected observation wells in North Dakota, 1937-47.

The following table shows the general fluctuations and net changes in the ground-water levels during 1947 in several regions in the State according to drainage basins. The regions are (1) the Red River basin exclusive of the Souris and the upper part of the Sheyenne, (2) the Devils Lake and upper Sheyenne River basin, (3) the James River basin, (4) the Souris River basin, and (5) the Missouri River basin exclusive of the James. This table indicates a net rise in water levels for the year in all regions except the James River basin where the precipitation for the year was less than average.

Basin	Number of wells	High	Low	Fluctuation	Net change
Red River	11	5.64	9.52	4.03	+1.61
Devils Lake and Upper Sheyenne River	4	15.17	14.76	.41	.26
James River	4	19.05	21.14	2.09	-1.70
Souris River	12	53.44	54.38	.93	.52
Missouri River	6	35.76	42.12	6.36	+1.83

#### WELL-NUMBERING SYSTEM

The well numbers in this report conform to a well-numbering system now being adopted for reports in all the Missouri Basin States. The numbering system is based upon the common land subdivisions and has been used previously with minor variations in reporting records of wells in many of the States outside the Missouri Basin. The numbers given to the wells according to this system serve the dual purpose of designating one well from another and of giving its location within the coordinate net of townships and ranges. In this report the number is reported first in the well description of each individual well.

In North Dakota, the land descriptions are referred to the base line which follows the Kansas-Nebraska State lines and to the fifth principal meridian. Thus, all of North Dakota is in the northwest quadrant of the coordinate system, that is, all townships are north and all ranges are west.

The numbers are divided into parts by numbers and letters. The first number gives the township, the second the range, and the third the section in which the well is situated. The subdivisions of the section are the quarter section, the 40-acre tract within the quarter section, and the 10-acre tract within the 40-acre tract. These are indicated by lower-case letters following the third number. The first letter gives the quarter

section, the letters a, b, c, and d referring to the NE $\frac{1}{4}$ , the NW $\frac{1}{4}$ , the SW $\frac{1}{4}$ , and the SE $\frac{1}{4}$ , respectively. Likewise, the second letter refers to the 40-acre tract within the quarter section and the third letter refers to the respective 10-acre tract within the 40-acre tract.

The lower-case letters are again followed by a number which refers to the numerical order in which the wells were scheduled in the smallest tract of land indicated by the last lower-case letter. If, for instance, two wells were scheduled in a tract of land and the locations of the wells were given by the same lower-case letters, then the wells would be designated by the numbers 1 and 2 following the letter.

In this report, the locations of most of the wells are given only to the nearest 40-acre tract but the locations of some are given to the nearest 10-acre tract. As an example of the use of the well number to designate the location of the well, the first well scheduled in the SW $\frac{1}{4}$ SW $\frac{1}{4}$  sec. 14, T. 130 N., R. 97 W. is numbered 130.97.14cc1. If a second well is scheduled in this same tract of land, it is numbered 130.97.14cc2.

## WISCONSIN

By F. C. Foley

### PROGRAM OF WORK

Measurements of water level in observation wells in Wisconsin were continued during 1947 and the program was expanded during the year. Measurements were started in 9 wells in 1934, in 10 wells in 1944 and in 77 wells in 1946. During the year 44 wells were added to the observation-well program and measurements were discontinued in 2 wells. Automatic water-stage recorders were installed on 8 wells during 1947, one was removed, and a total of 20 were in operation at the end of the year. Measurements of water levels in five wells in northern Wisconsin were made by the Wisconsin Conservation Department.

Investigation of the ground-water resources of Wisconsin in cooperation with the University of Wisconsin was continued during 1947 with emphasis on the artesian aquifers of the eastern part of the State.

### FLUCTUATIONS OF WATER LEVEL

Precipitation in Wisconsin during 1947 averaged 29.99 inches which is 0.63 inch below average. The northern part of the State was considerably drier than the southern part with a recorded maximum of 7.94 inches below average at Park Falls.

Of 13 water-table wells in the northern half of Wisconsin, all showed a net lowering of water levels during 1947 ranging from 2.32 feet in well Mr 28, in Marathon County, to 0.09 foot in well Ds-1, in Douglas County. The average for the 13 wells is a net lowering of 0.86 foot. Six water-table wells in the Coon Creek area, in Vernon and Monroe Counties, showed an average net rise in water levels of 0.29 foot. Four of the wells showed a net rise ranging from 0.13 foot to 1.06 feet and two showed a net lowering of 0.16 and 0.13 foot. Precipitation at LaCrosse was 0.80 inch above average, at Sparta, 0.06 inch below average, and at Viroqua, 3.25 inches above average. Fluctuations of water level in shallow water-table wells

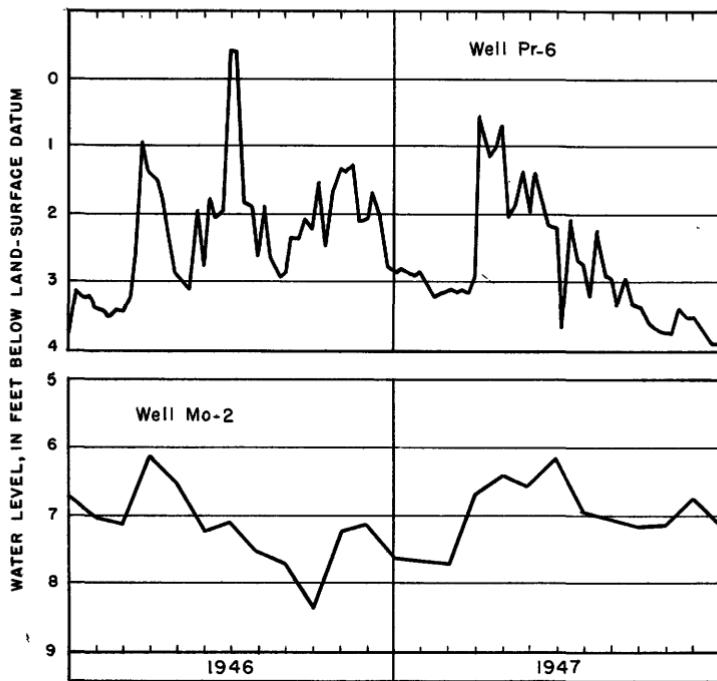

Figure 9.--Graph showing fluctuations of water levels in two water-table wells, Pr-6, at Park Falls, and Mo-2, near Cashion, Wis.

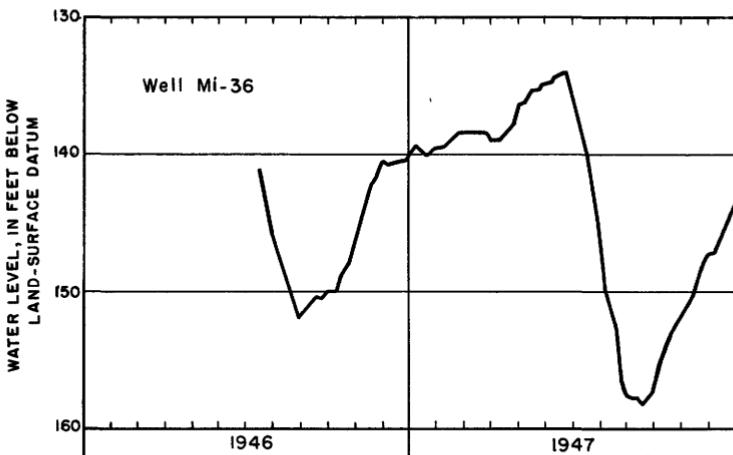

Figure 10.--Graph showing fluctuations of water level in well Mi-36, a deep artesian well at 27th and Hopkins Sts., Milwaukee, Wis.

show a close relationship to precipitation. Figure 9 shows hydrographs of two representative water-table wells.

Water levels in deep artesian wells in the Milwaukee-Waukesha area were at approximately the same levels at the end of 1947 as they were at the end of 1946. There was seasonal fluctuation in 1947 ranging from about 9 to about 65 feet in the area, with the greatest fluctuation occurring in the downtown and industrial areas of Milwaukee where pumping was heaviest. Highest water levels in the area were recorded from May 10 to June 25, the range in dates depending largely on the proximity of the observation wells to wells pumped for air conditioning and cooling purposes. Lowest water levels were recorded between September 5 and 26. Recovery was rapid during late September and October, and then more gradual until the end of the year. Figure 10 shows the hydrograph of well Ml 36, a representative artesian well in Milwaukee County.

One recorder-equipped deep well on the eastern edge of the city of Fond du Lac showed a net lowering of water level of 4.09 feet during 1947. The highest water level of the year was recorded on January 30 and the lowest on August 22. There was a general decline until mid-April, a slight recovery in late April and early May, a decline until the end of August, then a slow recovery until the end of the year. The total seasonal fluctuation was 6.69 feet with daily fluctuations of 0.5 to 1 foot due to pumping of the city and private wells, the nearest of which is about 0.4 mile away.

Well Bn 9, at 320 North Broadway, Green Bay, and owned by the Larson Canning Company, was equipped with an automatic water-stage recorder in August 1947. Static water level reached a low of 295.28 feet below land-surface datum on September 20. By the end of the year the water level had risen 68.98 feet to 226.30 feet below land-surface datum. Though the record is not complete for the year, undoubtedly the water level was lowest in September and highest prior to August.

Artesian wells away from the most heavily pumped areas showed nearly the same water levels at the end of 1947 as at the beginning. Well Ra 5, at Sturtevant in Racine County, showed a net lowering of water level during the year of 2.33 feet; wells Dg 9 and Dg 10, in Ashippun in Dodge County, showed net rises of 3.55 and 1.99 feet; well Mt 5, in Peshtigo in Marinette County, showed a net rise of 1.32 feet.

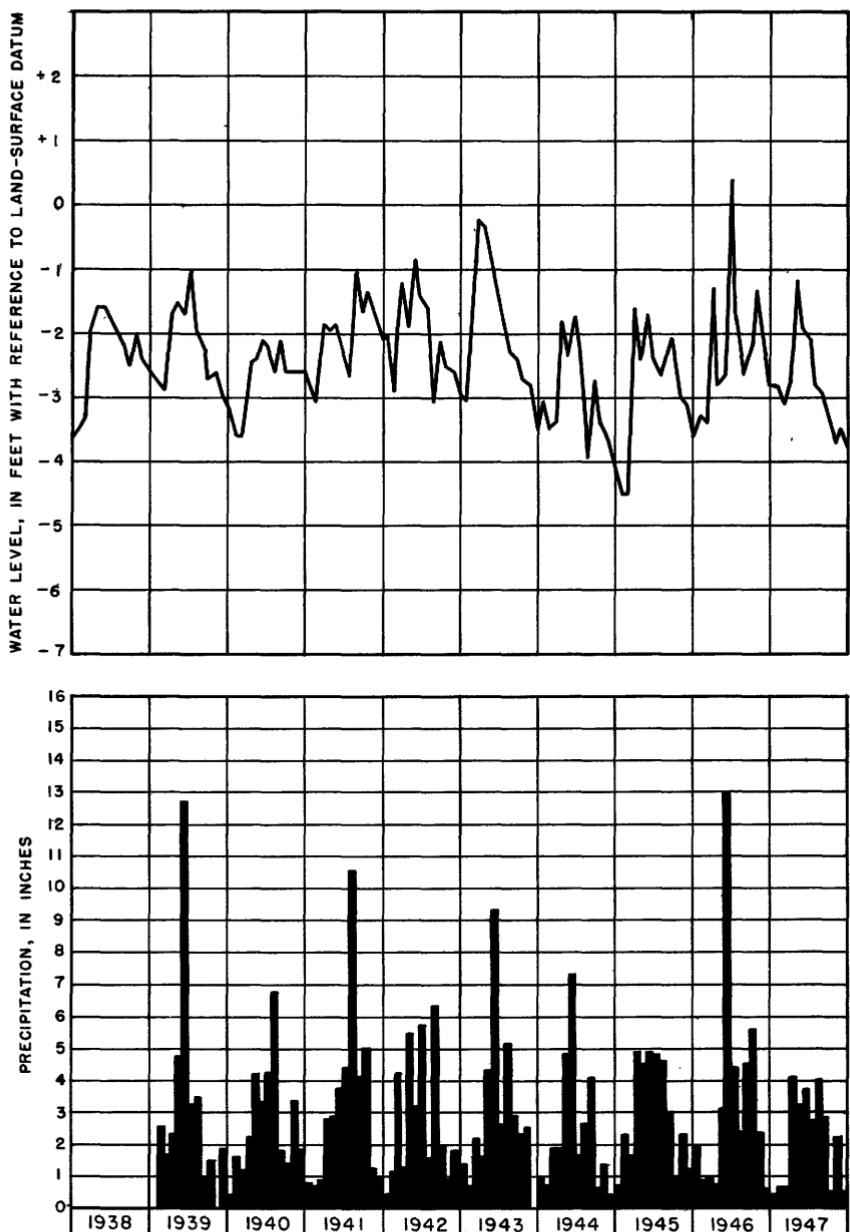

Figure 11.--Graph showing fluctuations of water level in well Pr-6, at Park Falls, Price County, Wis., and precipitation at the well site, 1938-47.

## WELL DESCRIPTIONS AND WATER-LEVEL MEASUREMENTS

Ashland County

As 1 (\*988, p. 351; 1018, p. 272; 1025, p. 255; 1073, p. 341). Lake Superior District Power Co. NW $\frac{1}{4}$ NW $\frac{1}{4}$  sec. 6, T. 47 N., R. 4 W., 6 miles south of Ashland, near power dam.
